7000 Quarts To The Acre!
STAHELIN'S NEW
"BRILLIANT"
 (Patent Pending)
EVERBEARING STRAWBERRY

BRILLIANT EVERBEARING STRAWBERRY is a true everbearing variety. Mmmm! Doesn't Strawberry Shortcake sound good? Department of Agriculture there isn't supposed to be any strawberries? Brilliant will supply these berries. Tests at an impartial experiment station have proved that new Brilliant will produce 7,000 quarts per acre the first year—2,000 more than any other variety on test. Perfect flowering. Described on Page 1. PRICE: 25 for \$2.95; 50 for \$5.15; 100 for \$9.50. Postpaid.

1951
Catalog

Stahelin's Nurseries
BRIDGMAN, MICHIGAN

To Become Popular A Variety Must Be Good

It took the Delicious Apple 30 years to become well known and popular. It has only taken our Scarlet Beauty about 6 years to become one of the best known and best liked strawberries grown in the U. S. today. In other words, a good variety soon proves itself, which this berry has done in a very short time.

Late Fruiting Season

Scarlet Beauty is a variety that will commence to ripen about the same time that the Premier variety is finished. It will continue to bear, over a long picking season, and this semi-late fruiting season brings it on the market when, in most sections, there are no strawberries to be had. We know of no variety that will produce such large size fruit late in the season. When we first introduced this berry, we thought so much of it that we offered to replace, free of charge, any plants that any customer purchased, which did not prove entirely satisfactory after fruiting. Up to date, we have had to make no refill of plants to anyone who complained of this sort.

PRICES:

25 for \$ 1.35	250 for \$ 6.45
50 for 2.35	500 for 10.25
100 for 3.45	1000 for 18.50
2000 for 35.00	

Scarlet **BEAUTY**

THE WORLD'S GREATEST STRAWBERRY

The size of Scarlet Beauty is practically indescribable. The plant is peculiar inasmuch as it only sends out one fruit stem, but this fruit stem will have from two to three huge berries on every plant.

Huge Size, Bright Color

The berry itself is extremely brilliant red color and has a large bright green calyx. This makes for beautiful appearing berries as they always look fresh no matter how long they have been packed. Buyers on the market marvel at the brilliant red color of this variety, coupled with the bright coloring of the calyx, which always makes it command a high market price. We believe that the Scarlet Beauty will produce more huge, first-class berries than any variety that we have ever seen.

Thrives in Poor Soil

Due to its plant making ability, the Scarlet Beauty will thrive and produce a crop of berries on rather poor soil. Scarlet Beauty is a perfect flowering variety which requires no pollinizing. The plant is rather small but exceptionally long rooted. It has healthy foliage, is an excellent plant maker, and an immense producer. **Perfect flowering.**

NEW BRILLIANT

(Patent Pending)

The Perfect Hybrid EVERBEARER

7,000 Quarts From One Acre

BIGGEST *Money-Maker of the Year!*

DO YOU WANT TO MAKE MONEY? The best way to make money is by growing BIG money-making crops and varieties that will produce the biggest profits per acre. We think that **BRILLIANT**—the patented new everbearing strawberry—is your answer.

NEW BRILLIANT Has Everything

This amazing variety originated in Northern Michigan, where we first saw it. The plants were a mass of large, bright red, luscious berries. Here, we thought, is the berry we have been looking for and trying to find for years! **Brilliant** is another find of that Plant Wizard—F. J. Keplinger. He produced the Gem and later the Superfection. It is a patented variety.

NEW BRILLIANT has an amazingly high production record of top quality, large, firm red berries—the color is absolutely bright red clear through even when mashed or finely cut.

The tangy, true-strawberry flavor is an outstanding characteristic of **NEW BRILLIANT**. Most everbearers lack this vigorous flavor. For fresh desserts, canning and freezing **BRILLIANT** is unbeatable.

Plants are of ordinary size with shiny, bright green leaves. Hardy, vigorous growers; prolific plant makers; produce well even on poor soils. On rich land, runners should be cut off until mid-August.

Offered This Year for the First Time. Our small original planting of **BRILLIANT** has increased to a point where we can now offer it to the public for the first time. Some plants were sent to various experimental stations in the U. S., and one impartial station, in particular, reported that their plot of **BRILLIANT** produced slightly more than 7000 quarts per acre before frosts in October stopped production!

Bigger Crops—Larger Profits

This amazing production record means greater profits per acre than ever before. Order plenty of our **NEW BRILLIANT** Everbearing Strawberry plants now and get your share of the **LARGER PROFITS**.

- Its Freezing Qualities

Proper Planting Is Essential

X X X At the left we show you a little diagram of how to properly set your everbearing strawberry plants. Each **X X X** X represents a plant. Plant them 15 inches apart as shown. The length of your rows depends entirely on the number of plants. Set at least 200 plants and you will realize a fine crop of delicious strawberries, at a time of year when common strawberries are not available. With 200 plants you can increase your planting until you can set an acre. It will keep you busy but you will make more profit from one acre planted this way than you will from 20 acres of ordinary crops. Complete Cultural Instructions will be sent with each order upon request.

F. C. Stahelin

Stahelin's Heavier-Producing Plants and Fruit Trees PROVE THEY ARE SUPERIOR Year After Year

C. A. Stahelin

I don't believe we need to say much about conditions as they exist today, because you know what they are. We have just gone through a like condition and this may become more stringent. Advancing prices in everything that the farmer or anyone else has to buy seems to be the order of the day. In other words, prices will necessarily go up and to you, who need a few plants or trees or anything else along this line, we say: "Now is the time to buy." We know that prices will not go lower, but they may go higher.

NOTICE

For approximate shipping charges, refer to the back of our order sheet enclosed with this catalog. Complete schedules and rates, as closely as they can be figured, will be found there.

IMPORTANT

Transportation charges on all stock listed in this catalog are to be paid by the customer, as the weight of nursery stock cannot be determined exactly in advance of shipment.

FALL SHIPMENTS

We encourage the fall planting of nursery stock. Plants and trees are dormant then, and when warm weather comes in the spring, your stock is ready to commence growing. Nursery stock cannot be shipped until it has had some cold weather to harden it up, and fall shipments are usually made after the middle of October. NO DISCOUNT ON FALL ORDERS.

C. O. D. ORDERS

We can ship C.O.D. if the order amounts to \$5.00 or more at full catalog price, no discount allowed, but 10c on each dollar must be included with your order as a down payment. If order amounts to \$5.00, send 50c with the order; if \$6.00, send 60c, etc. You may inspect express shipments before you pay. (Parcel Post not subject to examination.) If satisfactory, pay the agent the amount due.

CERTIFICATE OF NURSERY INSPECTION

Michigan State Department of Agriculture—Orchard and Nursery Inspection No. 1.

This is to certify that the nursery stock of Stahelin's Nursery, Bridgman, Michigan, has been examined and found to be apparently free from dangerous insects and dangerously contagious tree and plant diseases. Fee paid \$23.00.

Chas. Figy, Commissioner,
Lansing, Mich.

Bureau of Agricultural Industry,
C. A. Boyer, Director.

August 21, 1950.

We are devoting hundreds of acres to the raising of strong-rooted, extra hardy plants and trees. Up here in the North, on our sandy soil, we produce the finest rooted stock that can be grown, and this stock has constantly chalked up records for large production and high quality.

Look through our 1951 catalog. We list only the best, in the proven varieties offered in our line, that are needed for profitable planting.

DON'T WAIT TO ORDER

Our customers have been very fine in the past few years in placing their orders early. Please remember that the shipping of strawberry, asparagus and that class of plants, depends entirely on weather conditions here. WE POSITIVELY DO NOT SHIP ANY STORAGE PLANTS. We will endeavor to fill your order as close to the time specified as we can, but if excessive rain or cold weather hits us at that time of the year, there may be a slight delay.

10%

CASH DISCOUNTS

Orders received during January at the prices quoted in this catalog, **with cash in full enclosed**, are subject to a 10% discount. This amount to be deducted from your remittance. No cash discount on Bargains or Special Quotations made by mail. THIS DISCOUNT NOT GOOD AFTER FEBRUARY 1st, 1951.

STAHELIN'S GUARANTEE

We guarantee that all stock shipped by us will arrive in first-class condition if shipped by express or mail. If stock is damaged or unsatisfactory, claims should be made within three days after receipt of stock and it will be replaced free of charge. We guarantee all stock to reach you in live condition and if any item fails to do well and we are notified within thirty days or not later than June 20th, we will replace during the following season. We are not responsible for losses caused by improper planting, care, or unfavorable weather conditions and these factors will be taken into consideration when claims are made.

All stock is guaranteed to be true to name, but will be replaced free upon proof of being untrue to name. At no time are we responsible for more than the original cost of the stock.

Stahelin's PREMIER

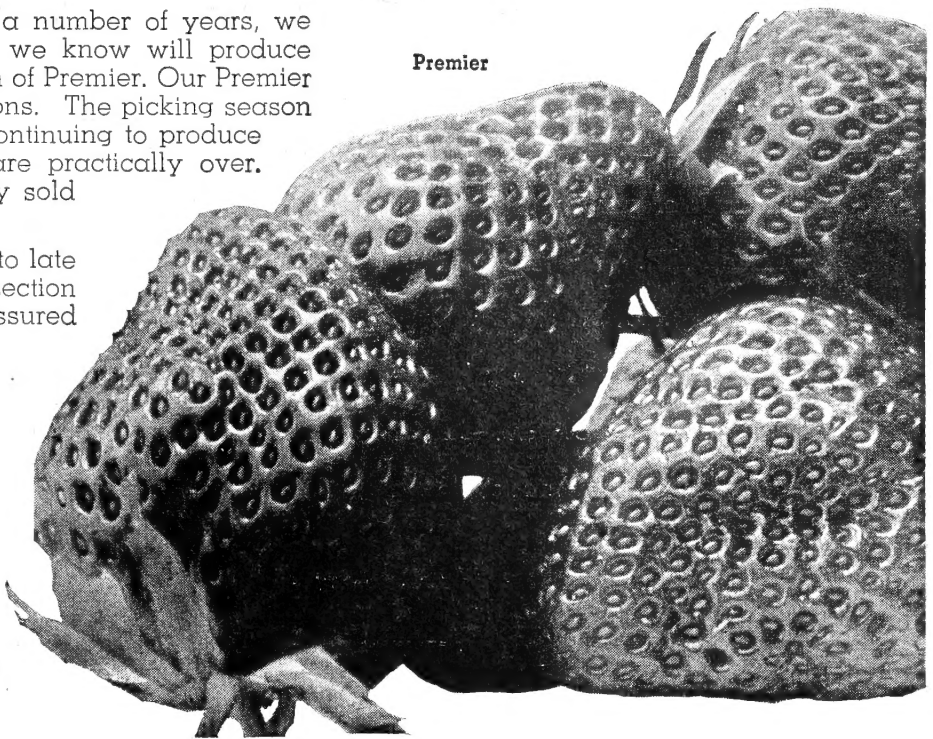

**Famous For Its
"Frost-Proof" Qualities**

By means of careful plant selection for a number of years, we have perfected a strain of Premier that we know will produce more plants per acre than any other strain of Premier. Our Premier is adapted to all soil and climatic conditions. The picking season is long, commencing with the first and continuing to produce large size fruit until the late varieties are practically over. Premier is very easily picked, and easily sold because of its large size.

Stahelin's Premier is practically immune to late spring frost and if you are located in a section where such trouble occurs, you can be assured of getting a fine crop if you will plant our Premier. This is due to the peculiar plant growth which it makes, almost completely hiding the blossom and protecting it from severe cold.

An extremely juicy berry, yet quite firm, making it an excellent shipper. It comes on the market when there are practically no other strawberries. Most of the fruit is pointed, although the berries are of various shapes, resembling most all varieties of strawberries. They are of bright showy red, and have a large calyx. If you want a big crop of fine fruit in spite of very cold weather when they are in blossom, plant Stahelin's Premier.

Premier

PREMIER PRICES:

25 for \$.95	100 for \$2.70	500 for \$ 8.50	2000 for \$30.00

Blakemore

[3]

BLAKEMORE

"YELLOWS FREE"

Great Shipping and Canning Berry

The Blakemore is by far the best early shipping berry the South ever had. Stands a lot of abuse and neglect in growing, more than any other variety we know of. Produces enormous amount of fruit of fine quality, and will produce this fruit on land where common varieties would be a failure. Desired by canners and coldpack men. Every Blakemore plant we offer is of the "Yellows-Free" strain. These plants will outbear the common run of Blakemore, and growers should take advantage of this fact. Blakemore is mid-season and excellent for the home garden or for market purposes. It is growing in popularity year after year and is a good money-maker. Berries are large, pointed and a solid red clear through. The flavor is mild and sweet.

PRICES:

25 for \$.80	100 for \$1.70	500 for \$ 6.45

SUPERFECTION

EVERBEARING STRAWBERRY

Continuous Bearer — Excellent Shipper

The new Superfection strawberry is of Northern Michigan origination.

CONTINUOUS BEARER. This berry has proved to be very popular due to the fact that it bears continuously from a short time after it is planted until cold weather.

EXCELLENT SHIPPER. The berries are slightly rounded, quite firm in texture, making them good distant shippers without damage, and they have a very good flavor.

BEST BY TEST. We have been testing everbearing varieties for a number of years and Superfection has proved to be, in our test lots, one of the best of the everbearing strawberries. It has done well under all climatic conditions and we urge you to try this new variety.

BRILLIANT EVERBEARING STRAWBERRY

(Patent Pending)

Look at our front cover and see the newest in Everbearing Strawberries—The BRILLIANT. It is also described on Page 1.

Plants set in April will produce huge crops until freezing weather. So great is this berry that the originator decided that it was too good to be offered by one firm. Two were selected in Michigan to offer BRILLIANT to the public—Stahelin's and one other—and these are the only places where you can buy this wonderful variety. TRY IT IN YOUR GARDEN AND THEN PLANT IT COMMERCIALY!

**Two good everbearers.
Perfect Flowering.**

Streamliner

Big, Honey-Sweet Berries In Only 50 Days

We believe that this is one of the finest of the everbearing varieties as regards flavor. It commences to bear soon after planting and produces an abundant crop of fruit all summer.

GOOD PLANT MAKER. The Streamliner strawberry has proved to be a very good plant maker with us, which is out of the ordinary with the everbearing varieties.

The berry is quite pointed, it is large, very sweet, and is produced in large quantities on the mother plant. It is well liked by the commercial everbearing growers because of its high performance, its large production, and the high price it commands when it becomes known. The demand for Streamliner is steadily increasing and we suggest that you order your plants now while they are available at these low prices.

Two Strawberries Recommended as The **BEST** for HOME FREEZING

Delicious Hardy **FAIRLAND**

Fairland is another one of the varieties developed by the U. S. Department of Agriculture to combat the Red Stele Disease. Fairland is being grown very generally in Berrien County, Michigan, one of the biggest strawberry growing sections in the U. S., as a market berry, and our growers here make very favorable reports on it. They are extending their plantings considerably each year. The Fairland Strawberry ripens just a few days after Premier. It is just as productive as Premier with a firmer berry. These berries are large in size and a light bright red color. Fairland has proved to be an excellent shipper for this reason and, as it is entirely Red Stele resistant, it does particularly well in the middle and upper northern states. A fine variety for garden use and one of the best we know of for freezing. A good plant maker and a variety which we recommend to you for trial.

Fairland

PRICES:

25 for \$1.00	100 for \$2.85	1000 for \$18.00

Two of our best dis-
ease-resistant straw-
berries.

New **SPARKLE**

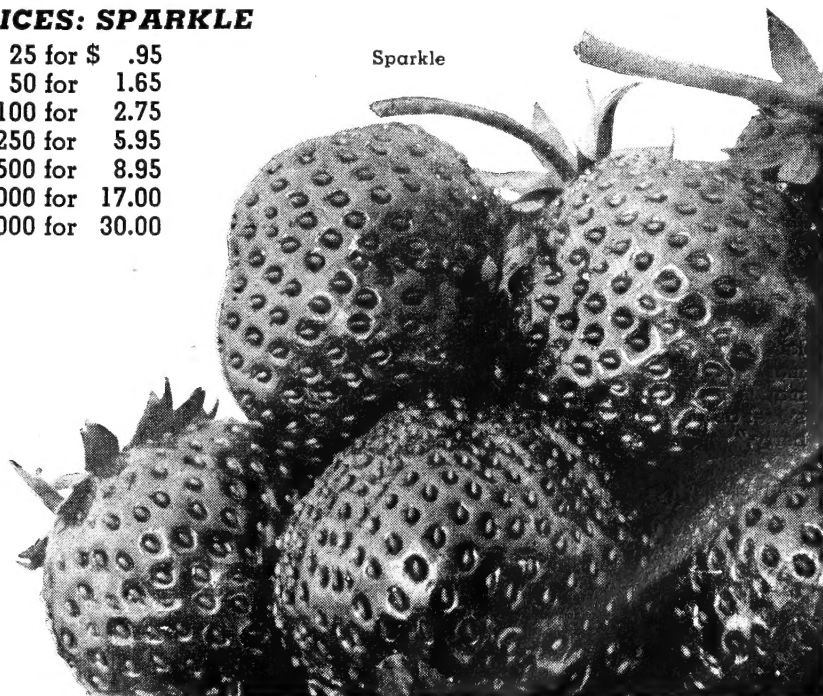

NAMED FOR ITS BEAUTIFUL COLOR

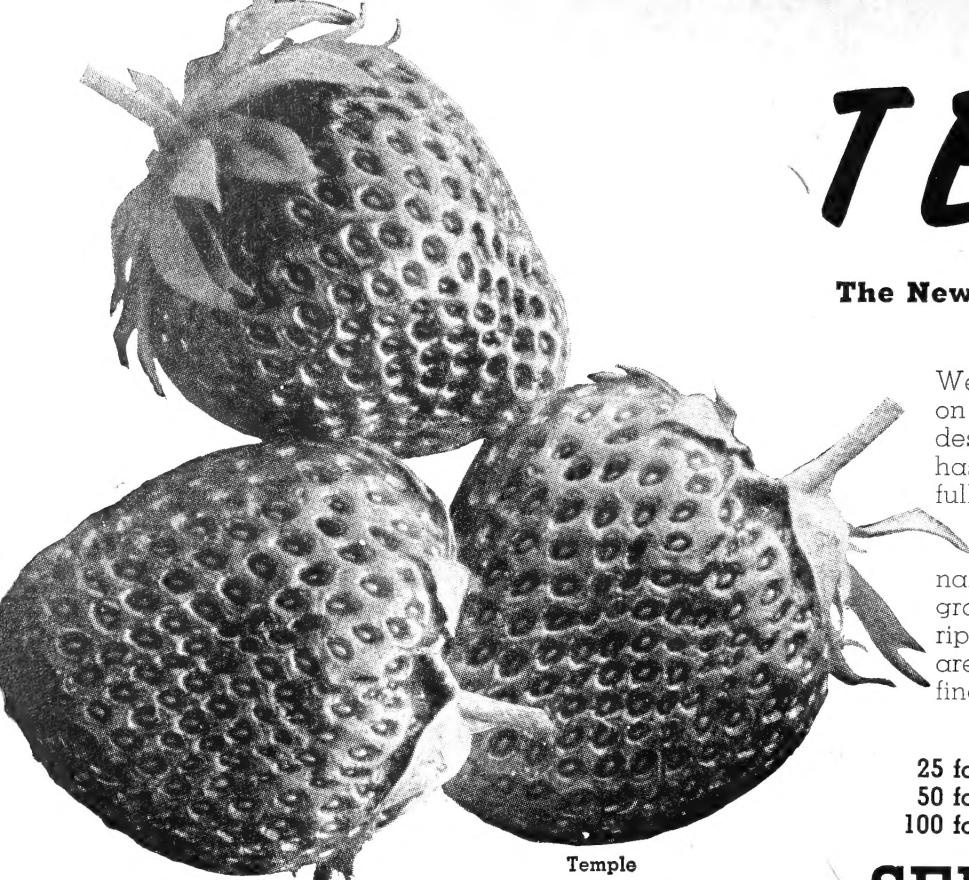

The Sparkle strawberry is the berry that came to us from the New Jersey Experimental Station. It is very resistant to Red Stele and other strawberry diseases which sometimes attack the weaker varieties. It will grow under conditions of wet weather where the ordinary strawberry would soon die. It gets its name chiefly from its wonderful sparkling appearance. It yields heavy crops and is mid-season in ripening. It is a quality berry, very uniform in shape, and medium to large in size. A good plant maker and we recommend it for trial. Exceptionally good for freezing!

Temple

TEMPLE

The New Strawberry That Is Entirely Resistant To All Root Diseases

We have fruited Temple quite extensively here on our farms and think that it is one of the finest dessert strawberries we have ever picked. It has a beautiful dark red color, is very firm when fully ripe. A very good shipper. It is a very remarkable grower, will survive wet weather conditions under which the ordinary strawberry would be a total failure. Plants grow unusually tall, yield heavily, and fruit ripens a few days later than Premier. Berries are large, have a brilliant calyx, and present a fine appearance when packed.

PRICES:

25 for \$.95	250 for \$ 5.95	2000 for \$30.00

100 for 2.75	1000 for 17.00	

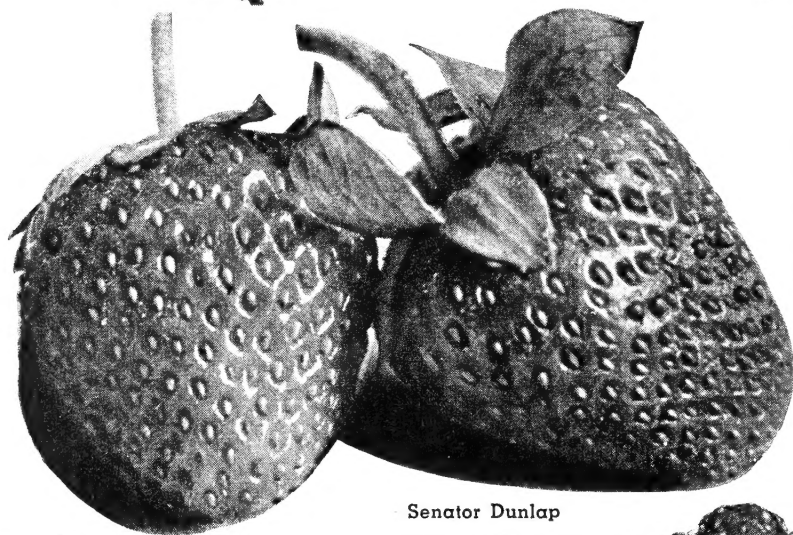

SENATOR DUNLAP

A Proven Variety For Over 30 Years

The Senator Dunlap is perhaps the oldest strawberry listed today. It was popular 30 years ago and is still popular. Much of this popularity comes from the housewife, who knows that the Senator Dunlap is one of the outstanding varieties for home use or canning. The plant is very vigorous, will grow on the poorest of soils, and seems to do well in every state of the Union. The berries are a beautiful crimson color, firm and quite pointed. We are pricing this variety in large quantities this year at a figure which has not been possible for a number of years, and you should increase your planting of Senator Dunlap now. A hardy variety and a good plant maker. We know it will please you.

PRICES:

25 for \$.80	250 for \$ 3.55	2000 for \$22.00
50 for 1.25	500 for 6.45	5000 for 49.50
100 for 1.70	1000 for 12.00	

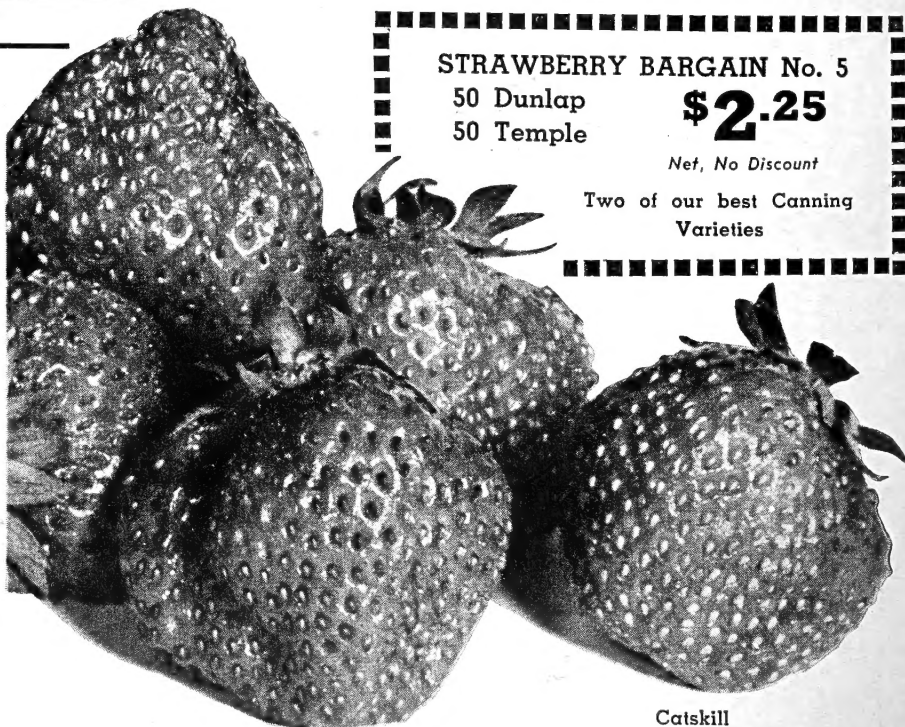

Senator Dunlap

CATSKILL

Catskill is now generally recognized as one of the best of the midseason to late varieties. This popularity is due to the fact that it will produce more quarts of large berries than any other variety. It is a sure cropper, as it ranks next to Premier in this respect. It rarely ever freezes. Catskill is bright shiny red, the berries hold their color very well, and when they are carefully packed present a very attractive appearance. The foliage of the plant is rich, waxy in appearance, and the fruit is produced on long picking stems. It ripens when the market is almost bare of fruit, and for this reason always commands a good price. Catskill strawberries are very sweet and are known as "The Sugar Flavored Strawberry."

PRICES:

25 for \$1.00	500 for \$ 9.50
50 for 1.70	1000 for 18.00

Two of our best Canning Varieties

Rubel

Giant Cultivated BLUEBERRIES

The Greatest Development in Fruit Growing

The cultivated blueberry will bring you more cash money per acre than any other type of berry plant that we know of today. These marvelous berries can be grown on any soil that is moist as long as it has a slight acid reaction. The fruit is remarkably large and the quantity is such that you cannot adequately describe it. It is unfortunate that every one of our customers cannot see these plants in bearing or there would be at least a dozen in every garden. We offer one-year plants at a low price and you can get started at small cost. We offer several varieties and suggest you plant more than one sort to prolong your picking season. Free cultural instructions.

RANCOCAS Very Early

The Rancocas variety of blueberry is of excellent quality, and a very good shipper. The bush does not grow quite as tall as Rubel, but it produces a lot of fruit over a long picking season. Always commands a good price because it is early. **PRICED BELOW.**

BARGAIN NO. 6

Two of our largest size blueberry plants that will bear this year! Your choice of variety.

1—4 yr. old plant

1—5-8 yr. old plant

\$4.35 value only

\$3.45

Net, not prepaid

STANLEY Early Midseason

A tall vigorous grower. Produces very large berries of excellent quality. Thick shiny leaves. A good variety to plant as companion to Rubel and Jersey. **PRICED BELOW.**

JERSEY Midseason

In our opinion, Jersey is superior to some of the other blueberries. The bush is very upright, vigorous and a large producer. Fruit is enormous, very attractive, firm and sweet. Recommended for home use and shipping. **PRICED BELOW.**

RUBEL Late

This variety was one of the first that was offered to the public, and has continued through the years to be one of the best. It is a parent of many of the present hybrids. Bush is upright, vigorous, hardy and productive. Heavy bearer of large fruit. **PRICED BELOW.**

One of
Stahelin's
Bearing-
Age Plants
One Year
After Setting

Paradise Asparagus

Stahelin's Pedigreed ASPARAGUS New PARADISE

Early, Easy to Grow, Rust Resistant, Immense Money Maker

The New Giant Strain of asparagus. It will produce a crop one or two years sooner than will any other known variety today. It is rust resistant, producing stalks of immense size and wonderful appearance. Is easy to grow, and once planted will last from 12 to 15 years with very little care. Paradise is the first asparagus to produce in the spring, and this crop is harvested early when you do not need to be bothered with other things on the farm.

Paradise asparagus offers you a great opportunity to make money. These fine large rooted plants, produced from expensive pedigreed seed, enable you to buy the world's finest at a cost no higher than for common stock. Grown on special sandy soil, fertilized and dug with special machinery to get the whole root system, we offer you a premium plant at a reasonable cost. Paradise asparagus does not require any special care. We have complete culture on asparagus, ask for it when ordering.

MARY WASHINGTON

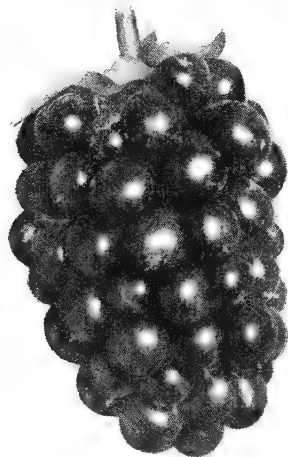

The pedigreed seed that we use produces specimen stock often more than an inch in diameter. It is very crisp and delicious. Wonderful for canning. The heads of Mary Washington are very solid and compact; thus, always commanding a better price than asparagus that has loose heads. This variety is absolutely rust resistant. Grows very fast and comes up exceedingly thick in the row, producing a very heavy crop. Approximately 5,000 plants are required to set an acre. Once planted they last for years, requiring little care. Starts to bear in Michigan in May and continues for about two full months.

We can furnish asparagus in large quantities at attractive prices. Write us for prices.

Stahelin's Hardy BLACKBERRIES ALFRED

This is the most coreless blackberry that we have. Succeeds almost everywhere. It has excellent flavor, very firm, and the size holds up well to the end of the long picking season. Has very small seeds. Hardy and has withstood 30 degrees below zero. Ripens a few days earlier than Eldorado. Plant is very vigorous grower and has at no time been infected with common blackberry diseases. Its Michigan origination makes it adaptable to all sections. **PRICED BELOW.**

ELDORADO EARLY HARVEST

Produces a full crop of jet black berries of large size, delicious aroma, and flavor. Excellent shipper, retaining its rich glossy black color after being picked. Very small core—a favorite for canning. Extremely hardy. Most of the fruit is borne on top part of plants and care should be taken when trimming not to cut back too far. **PRICED BELOW.**

We think this is the finest of all blackberries for home use. Ripens very early, is fair in size, deliciously sweet, and has very few seeds. The only blackberry that some housewives use for canning purposes. Very desirable for freezing because it does not have many seeds.

New "Ebony King" BLACKBERRY

**FIRST TO RIPEN
GUARANTEED TO BEAR
100%**

The Ebony King blackberry is offered to the public for the first time this year and it is absolutely new. To the blackberry growers who have been raising this fruit, it will mean that you can now get a variety of which every plant is guaranteed to bear 100%.

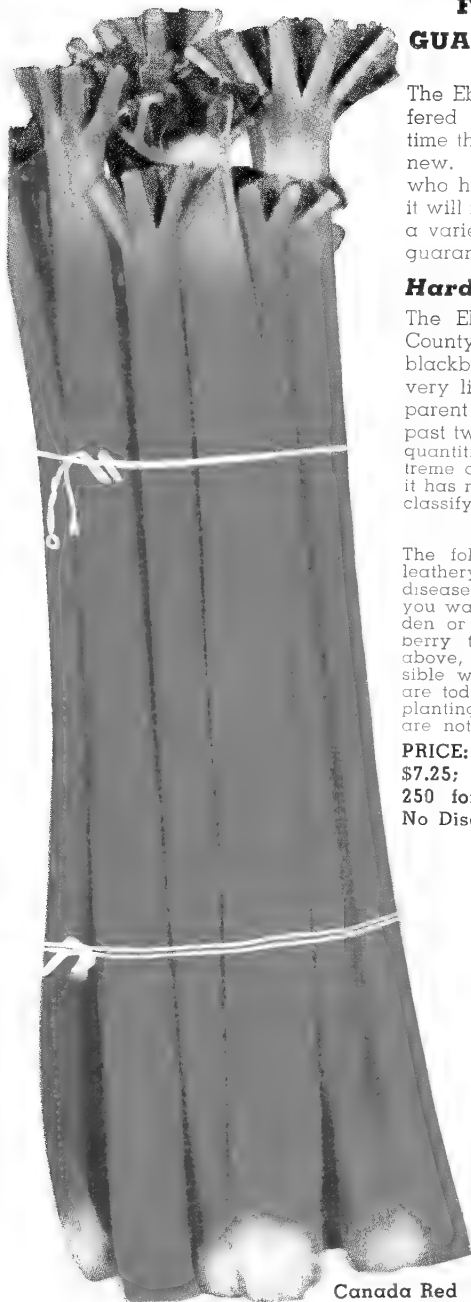

Hardy—Michigan Origination

The Ebony King originated in Berrien County, Michigan. It is a very large blackberry, of high dessert quality, with very little core. It is jet black and the parent plants which we have fruited the past two years have produced enormous quantities of fruit. We have had some extreme cold during these testing years and it has never winter-killed at all, so we can classify it as an extremely hardy variety.

Disease-Free

The foliage of the Ebony King is quite leathery and has shown no signs of any disease whatsoever in the testing fields. If you want a few blackberries for your garden or 100 plants, this is the best blackberry that you can buy for, as stated above, it will bear 100%, which is not possible with the other blackberries as they are today. We suggest you make a trial planting of this excellent variety. They are not yet available in great quantities.

PRICE: 6 for \$1.95; 12 for \$3.75; 25 for \$7.25; 50 for \$13.50; 100 for \$21.00; 250 for \$46.50; 500 for \$87.50. Net, No Discount.

Ebony King

Canada Red RHUBARB

The Chipman strain of the Canada Red rhubarb is the finest obtainable today. A decided improvement over the common Canada Red. This variety is intensely red, therefore excellent for market purposes. **PRICES: Large Divisions,** Each \$0.55; 3 for \$1.50; 10 for \$4.50; 100 for \$39.50; 500 for \$175.00.

MacDonald RHUBARB

A Canadian origination, it is bright cherry red the full length of the stalk, very large size and a huge producer. **PRICES: Large Divisions, Each** \$0.45; 3 for \$1.20; 10 for \$3.50; 100 for \$32.00; 500 for \$125.00.

Valentine RHUBARB

The newest of the red varieties. Developed in Canada. Gives you large stalks of very dark red color. Flesh is extremely tender and has a fine flavor. Produces a bright red sauce that is very tasty. Excellent for pies! We recommend it for trial. **PRICES: Large Divisions, Each** \$0.75; 3 for \$2.10; 10 for \$6.50; 100 for \$59.50.

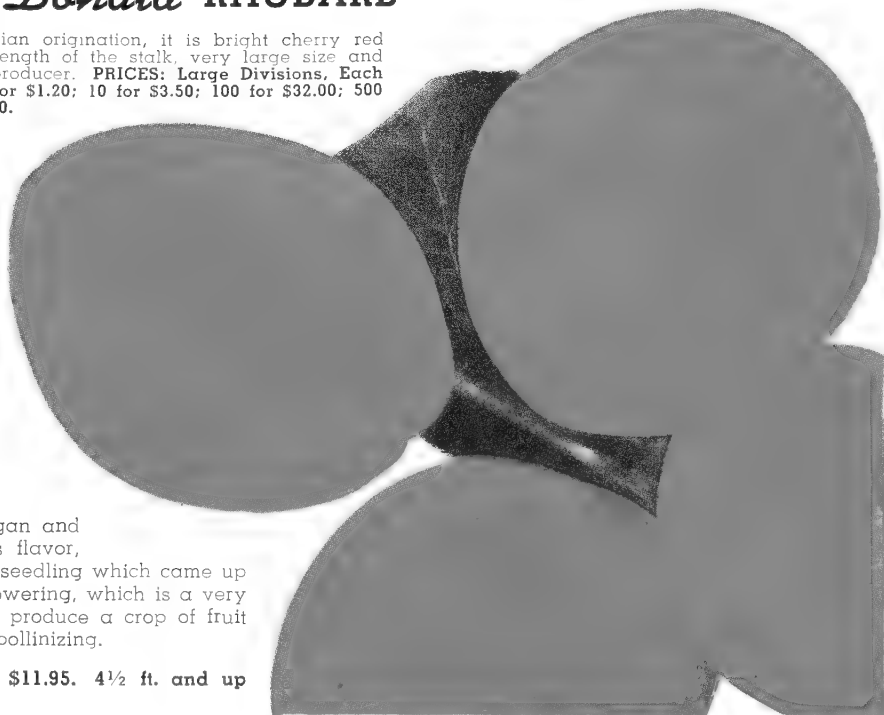

Starglow

★ **APRICOT** ★

**A VERY HARDY APRICOT,
ORIGINATING IN MICHIGAN**

This marvelous new apricot originated in central Michigan and is of very large size, brilliant yellow color, marvelous flavor, and absolutely freestone. The fact that this apricot is a seedling which came up in Michigan should make it especially hardy and late flowering, which is a very desirable feature in all apricots. Starglow apricots will produce a crop of fruit for you where most of the other apricots will fail. Self pollinizing.

PRICE: 3 to 4 ft. trees \$1.50 each; 3 for \$3.75; 10 for \$11.95. 4½ ft. and up \$1.95 each; 3 for \$4.50; 10 for \$12.50.

Michigold

NEW *Michigold* PEACH

Large Size and Brilliant Color

This variety ripens at about the same time as Hale Haven, but it is fully 15 to 20% larger in size. Has a brilliant golden color with a large amount of red if allowed to ripen, at which time it will run fully 60% red. It is a better quality peach than Hale Haven or South Haven and its large size always makes it bring a premium. It is freestone, self-pollinizing, and the tree is extremely hardy due to the fact that this variety originated in Michigan. Michigold should be more heavily planted by commercial growers.

WHITE HALE AND MICHIGOLD PRICES:

	Each	5	10	25	100
7/16 in. caliper.....	\$1.25	\$5.75	\$10.50	\$24.50	\$ 80.00
9/16 in. caliper.....	1.35	6.45	11.50	27.50	95.00
11/16 in. caliper.....	1.55	7.45	14.50	32.50	120.00

WHITE HALE

White peaches are not generally regarded as sorts to be planted for market purposes, but owing to the unequalled quality and extreme size of White Hale, we think it should be more heavily planted for commercial purposes. This peach originated on our own farm and is the best white variety we have ever seen. It is exceptionally hardy and has produced a crop of fruit practically every year since it was introduced. The flavor is remarkable—honey sweet—and of very high quality. If you have a roadside trade these peaches will bring you a premium over common varieties. Freestone. **PRICED ABOVE.**

White Hale

Red Leaf Peach

New RED LEAF PEACH

Brilliant Red Foliage All Year

We offer this brilliant red leaf shrub as something quite new in the ornamental field. This shrub is not only a brilliant ornament, but it produces worthwhile fruit at the same time. The fruit from this tree is white, medium size, and very highly flavored, making it especially desirable for pickling. Its habits of growth are practically identical with the common peach and its deep rose color blossoms against the red foliage produce a very pleasing picture when set among other plantings. **PRICE: 3 to 4½ ft. trees 95c each; 2 for \$1.80; 10 for \$7.50. 4½ to 6 ft. trees \$1.50 each; 2 for \$2.50; 10 for \$11.50.**

The Two Newest Stahelin-Recommended PEACH TREES

Hon-ee-gold
TRADE MARK
(HONEYGOLD)

**Will Not
Dry Rot
Fine Shipper**

**HAS NEVER WINTER-KILLED HERE—
HAS DELICIOUS FLAVOR**

This is the new peach which one of our customers named for us, a native of Michigan and a proven variety that has all of the good points and none of the bad. The Honee-gold peach is a marvel in size, slightly on the round type, 10% larger than Elberta. It ripens very late on the tree, has a brilliant red cheek and packs up beautifully in the bushel. Hon-ee-gold has excellent flavor. The inside is golden yellow with a slight amount of red next to the pit. Somewhat on the dry side which helps its shipping qualities.

In our tests this peach simply does not rot, but dehydrates and virtually dries up before rotting. Skin texture is heavy, like Elberta, thus making an excellent peach for shipping. Very thrifty upright growing tree which has never winter-killed here. Freestone. **PRICED BELOW.**

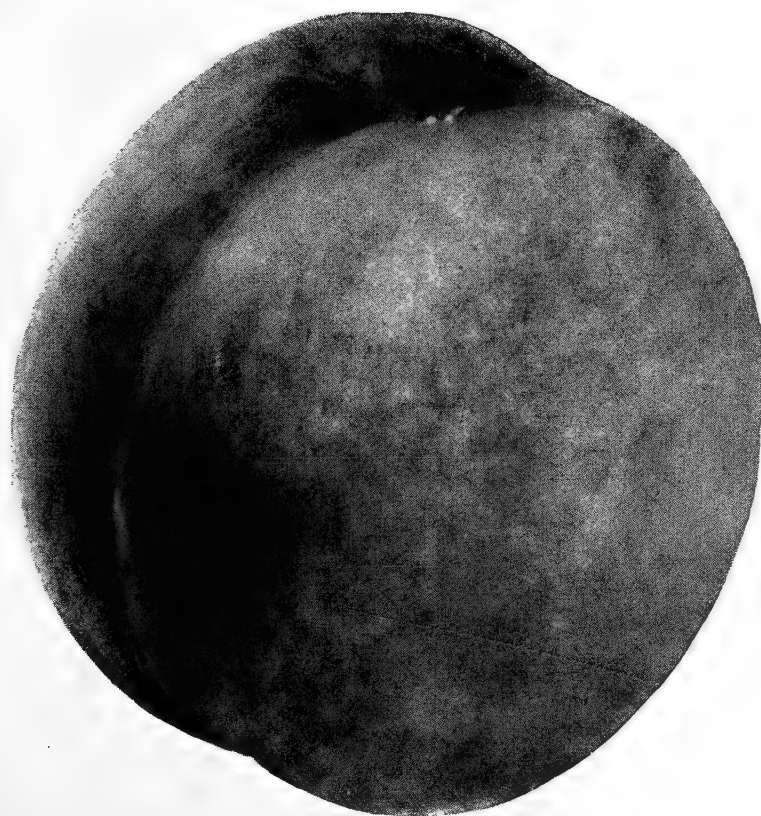

Hon-ee-gold

SPECIAL BARGAIN HUSKY 18 to 30 INCH TREES

Due to the demand that we have from a great many of our customers who are situated in the South, who wish to have their trees headed very low, we have grown a number of the husky 18-30-inch trees. These trees are headed especially low and we can furnish them in all standard varieties listed at right. **Elberta, Sullivan's Early Elberta, Hale Haven, Redhaven, Kalhaven, Perfect**

Hale, J. H. Hale, Scarlet Elberta, Amber Gem and White Hale. We will fully guarantee these trees in every way it is possible to guarantee a good tree.

PRICE—In lots of 100 only—\$25.00; 500 for \$100.00. Net, no discount.

Stahelin's Red Rocket

RED ROCKET **10% Larger Than Hale Haven— More Color**

RED ROCKET is the newest of the yellow freestone peaches and it ripens at a time when the market is always good. It has an excellent yellow skin with a tremendous amount of red color when fully ripe. The flesh is firm and extremely fine textured. The trees on tests have been excellent bearers and fruit is outstanding for canning and shipping.

Red Rocket is considerably larger than Hale Haven and ripens about four to six days later. It is a distinct bud sport of Fertile Hale and the tree originated in our orchard—the one branch on the parent tree showing all red and fully ripened when the balance of the fruit on the tree was grass green. A new variety obtainable only from Stahelin. It does not dry-rot. **PRICED BELOW.**

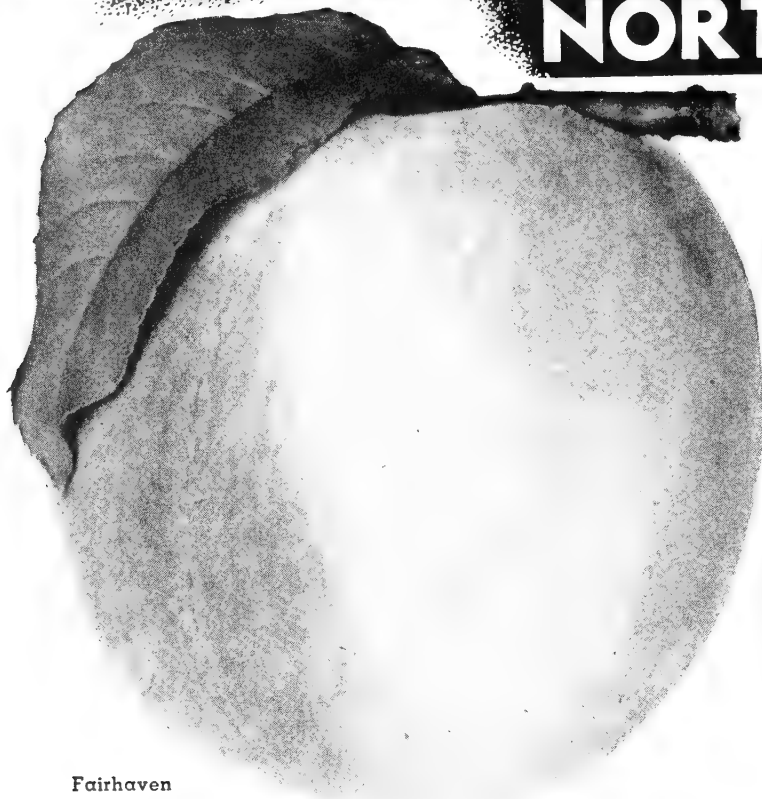

PRICES — Hon-ee-gold & Red Rocket

Stahelin's Selected

NORTHERN GROWN

Fairhaven

FAIRHAVEN

Early — Heavy Producer — Hardy

We have increased our planting on Fairhaven peach trees and can now offer them at very attractive prices. This is a wonderful variety and we urge the commercial planters to set it heavily. It is very hardy and during the seasons when the blossoming period is cold or foggy, it will produce a full crop of fruit when many other varieties would fail. Fruit is nearly round, mostly bright golden color, with an attractive red cheek which shows up when the fruit is still very green. Fairhaven is an excellent shipper. It matures about a week before Hale Haven and right at the end of the Redhaven season. Freestone. **PRICED BELOW.**

NOTICE

We cannot ship fruit trees into the following states: California, Colorado, Idaho, Nevada, Oregon, Utah, and Washington.

GOLDEN JUBILEE

Sweet and Juicy — Frost Resistant

Very early. Excellent for commercial planting. Fruit is somewhat oblong in shape, and has a brilliant golden color with a slightly red cheek on one side. It is golden-fleshed, very juicy, and a freestone. Perfect pollinizer. The tree is extremely hardy, producing fruit when other varieties are frozen. **PRICED BELOW.**

Golden Jubilee

Two California-Type CANNING PEACHES

NUGGETT

AMBER GEM

We have been watching this new Clingstone peach in our orchard for several years and it is distinctly a beauty. It is clingstone until dead ripe and then it will come off the pit. Brilliant golden yellow with an occasional slightly red cheek. It has a marvelous flavor and ripens from 7 to 10 days after Elberta. Especially hardy, producing a crop when most other varieties are winter-killed. Plant 2 to 6 for home use and you will never regret it. Nuggett — the better peach. **PRICED AT RIGHT.**

A peach that is huge in size, extremely bright red in color, tinged with yellow, and a clingstone variety. The tree is thrifty, bears an enormous crop, and is a wonderful peach for canning. Extremely heavy skinned, and the finest shipping peach that we have. Very hardy. Used by commercial canners almost 100% in this territory and other canning centers. This variety does not dry rot on the tree and we feel that every grower should plant a few trees for trial. **PRICED AT RIGHT.**

PRICES — Fairhaven, Golden Jubilee, Nuggett, Amber Gem

The Finest That Money Can Buy PEACH TREES

HALE HAVEN

Early — Excellent Shipper, Canner

Colors all red long before it is ripe, and retains its richness of flavor over a long period. Is round in shape, very sweet flavor, and ripens about a week before Elberta. Freestone. Hale Haven is one of the greatest shipping and canning peaches ever introduced. It was originated in Michigan. It is hardy and self-pollinizing. One of our most popular peaches here. Wonderful for distant shipping. **PRICED BELOW.**

Stahelin's Peach Trees, produced under cold weather conditions, are hardy. Priced as low as 25c each in 100 lots.

Hale
Haven

Kalhaven

KALHAVEN

Immense—Red All Over—Good Shipper

A Michigan peach which is a result of a cross between the J. H. Hale and the old Kalamazoo variety. Immense in size; its color and flavor are excellent. Very hardy. It is large, round in shape, a beautiful red color all over, and it is an extremely good shipper. Ripens a few days after Elberta. Freestone, self-pollinizing. **PRICED BELOW.**

REDHAVEN

Excellent Extra Early Market Peach

The Redhaven peach is a Michigan origination which makes it especially hardy. This peach is gaining popularity and it is being very widely planted because of its extreme high red color. It is one of the earliest, if not the earliest peach that we have and it carries a good color long before it ripens so that you can pick it almost any time that you desire. It is an excellent shipper. The fruit is very firm, easy to handle, and has a brilliant golden firm-textured flesh. It is freestone and self-pollinizing. **PRICED BELOW.**

NO STORAGE STOCK

Trees of any type ordered from Stahelin are never taken from storage. Our trees are heeled in outside, subject to all winter weather with no protection. This makes them hardy.

PRICES — Hale Haven, Kalhaven, Redhaven

Dormant bud trees. Well branched and rooted.

Redhaven

Experience Produces *Stahelin's* Sturdy Fruit Trees

Scarlet
Elberta

SCARLET ELBERTA

Extra Heavy Crops—Needs No Thinning

Ripens a few days earlier than common Elberta, somewhat larger in size, and absolutely hardy. Uniformly yellow fleshed, and its color is blazing bright red. The tree is vigorous, strong growing, and bears young. Sets a heavy crop but does not require thinning. Self-pollinizing and wonderful for market purposes due to its attractive appearance. Flesh is sweet, making it ideal for desserts and canning. **PRICED BELOW AT LEFT.**

ELBERTA

Famous for Flavor — For Making Money

No other peach has ever attained the popularity of this variety. Roundish oval in shape, golden yellow skin with a slightly red blush on the cheek. Fruit is very thickly skinned, which makes it ideal for shipping. It is freestone and self-pollinizing, also a good pollinizer for other varieties. Ripens medium late and remains in good condition on trees for a long time. Trees are quite hardy, although they will not stand frost conditions as well as some other sorts. Usually bear the third year and enormous producers at maturity. Elberta is excellent for shipping, canning, drying, and freezing. **PRICED BELOW AT LEFT.**

Sullivan's EARLY ELBERTA

**New—Larger—Better—Ripens 7 to 10 Days
Before Old Elberta—Sells Fast**

Sullivan's Early Elberta is the new type Elberta peach that is sweeping the peach growing section of the country. The tree is very hardy and it is rapidly replacing the old standard Elberta peach wherever it has been tried, chiefly because of its ripening season which is far ahead of the ordinary Elberta. Ripens 7 to 10 days before Elberta, identical in shape, color, flavor, but is slightly larger in size. Excellent shipper. **PRICED BELOW.**

PERFECT HALE

**A Money-Maker—
Weathers Drought—Cold**

A perfect flowering yellow variety. The Perfect Hale will ripen a few days after you have picked your Elberta peaches. This will lengthen your picking season a great deal. This is an Elberta type, although it is nearly round in shape. It has the rich "Hale" flavor, but its quality is about like Elberta, although it is more highly colored. Flesh is exceptionally firm, and richly flavored. Freestone. Perfect Hale has proved to be one of the best in hardiness. **PRICED BELOW.**

Full Crops of Large, Easy-to-Pick Fruit In the Smallest Yard

Plant Stahelin's

DWARF FRUIT TREES

Dwarf apples and Dwarf pears are about the only dwarf trees that can be grown successfully. They produce the same as the larger trees and bear quickly. Two to three years after planting you can usually expect to get quite a crop of fruit. If you are cramped for space, plant a few of these dwarf trees. They only grow 10 to 12 ft. high and can be planted 15 ft. apart. We use the best of Malling understock and you are assured of getting good trees.

DWARF APPLES

The Gardener's Delight

Our Dwarf Apple trees are hardy and productive, often bearing more fruit than standard trees of proportionate size. Due to their small size, they are easy to prune and spray and the fruit is extremely easy to pick. Especially attractive in spring when they are in full bloom. We offer four varieties in these dwarf apple trees: Cortland, Yellow Delicious, Red Delicious, and Stayman's Winesap. **PRICE: 3 to 4 ft. trees, \$2.85 each; 3 for \$7.50.**

Delicious

DWARF PEAR TREES

**THE TREES ARE SMALL
BUT THE PEARS ARE BIG**

These beautiful heavy-bearing trees are offered in one variety only, which is Bartlett—the old standard. It is the best pear that we have today for all purposes. These trees produce top quality fruit, often larger than average trees. Foliage and size make them very attractive for landscape work. Ideal for the small yard.

PRICE:

2-3 ft. trees, each \$1.75; 3 for \$4.50; 5 for \$6.95. 3-4 ft. trees, each \$2.25; 3 for \$5.95; 5 for \$8.75.

Make Money on Raspberries the First Year!

2 Year Bearing Age Plant

Plant STAHELIN'S 2-yr.-old BEARING AGE PLANTS

As a great many of our customers desire quick results in their gardens, we have produced a few thousand of these large size black raspberry plants to supply this demand. These black raspberry plants are very large. They will run from 18 to 24 inches in height. They will all be branched and they will have a mass of heavy roots. If you plant them carefully every one of them will live and will produce a partial crop for you the first year. A great many commercial growers are planting this type of plant as it assures them of getting a full crop in two years, whereas the one year plants must be grown three years in the field before they will bear to any extent. We suggest to those that order these two year plants that they cut them back to some extent and not allow them to bear fully the first year.

Stahelin's BLACK RASPBERRIES

CUMBERLAND **KING OF THE BLACKCAPS**

Most popular black raspberry today because of its great size, beauty, firmness and productiveness. The fruit is the largest of the black raspberry family, often measuring almost an inch in diameter. Cumberland is very hardy, will stand severe drought and cold weather conditions well, without injury. It sets a great many berries, and should be heavily trimmed to get best results. Wonderful canning berry, makes delicious pies and jelly. Commands top market prices. Almost disease free and very popular because of this quality. Able to grow on almost any soil that is not wet.

LOGAN **EARLY SWEET BLACK RASPBERRY**

An Ohio origination. Logan ripens seven to ten days ahead of Cumberland, which allows the grower to get on the market ahead of other varieties, giving him an opportunity to make some real money. Produces immense crops of jet black berries, as large as Cumberland. Does not crumble, and the last picking looks as nice as the first. Stands severe weather conditions. A great deal of its present popularity is due to its "disease-free qualities." Of high dessert quality and fine for canning. **PRICED ON LEFT.**

FREE Cultural Instructions Included with Order if requested

MORRISON

THE GIANT BLACK RASPBERRY

This variety originated as a chance seedling in northern Ohio and has attracted a great deal of attention by commercial growers because of its abnormal size. The plant is an extra strong grower, being quite free from the common black raspberry diseases. Ripens somewhat later than Cumberland and has a very dark glossy color. Berries are firm in texture and high in quality. Plants are not plentiful and price is somewhat higher than commonly asked for the old varieties, but we believe a trial planting will prove they are worth more.

PRICES — 1 Year No. 1 Plants

Stahelin's RED RASPBERRIES

LATHAM THE FAMOUS LATE RED RASPBERRY

The Latham is a big, late ripening, red raspberry that grows on a very stiff cane and comes on the market at a time when practically all other raspberries are gone. It is very productive; will produce from 5,000 to 7,000 quarts per acre, which is about twice as much as any other red raspberry will produce today. This is a superior variety which does well in all sections of the country. It is adaptable to all sorts of soil conditions, climates, and sections. Cold weather has no effect on Latham, as it originated in Minnesota. A great shipping and canning berry. Produces fruit of large size, fine color and good flavor.

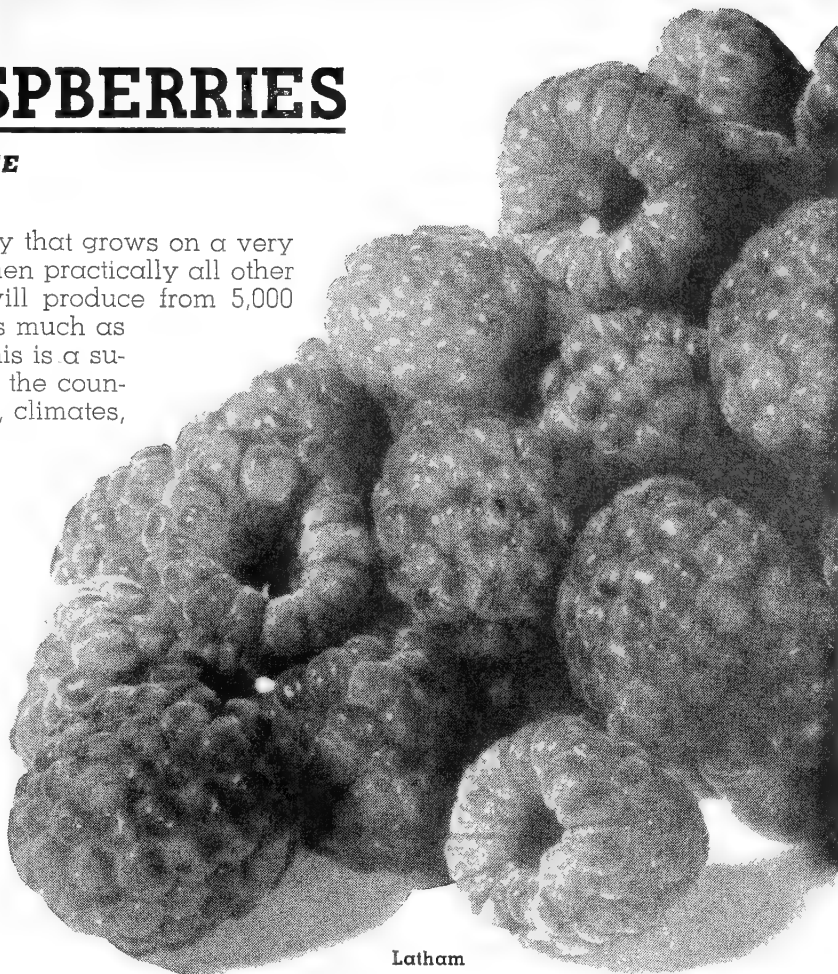

The plants we offer are of the best quality and carry double and triple inspection certificates as being disease-free. Planted on disease-free soil they can be kept this way. Our No. 1 plants are heavy, selected stock.

PRICES:

Latham

INDIAN SUMMER EVERBEARING

A berry that has beauty, flavor and everything combined to make an ideal everbearing variety. Has marvelous keeping qualities—a sensation because of its size and unusual beauty. Bears a large crop in the spring and in the fall. Plants are thrifty growers, hardy, free of any diseases, and enormous producers. Berries are excellent for eating, canning or freezing, making delicious jams and jellies. A trial planting will convince you.

	1000 for 65.00	

SUNRISE THE FINEST EARLY RASPBERRY TODAY

A comparatively new early red raspberry, which we recommend very highly. It starts to ripen in Michigan the latter part of June, about two weeks ahead of Latham, and because of its habit of sending up long shoots from the bottom of the cane, which ripen later than the buds at the top, it has an extremely long picking season. About the size of Latham, and a bright red when ripening. Fine textured, juicy; does not crumble, and very firm. Does not require expert attention to grow. Plants are vigorous and bear heavily. Sunrise is easy to pick, easy to sell, easy to grow and to eat.

SUPER-SIZE BEARING AGE FRUIT TREES

For the first time in years we are in a position to furnish our customers with Super-King-Size bearing-age Fruit Trees. If you want 6 to 12 trees and quick results, order these super-size trees! They will bear in half the time and can be furnished in almost any variety. By setting these large trees, you save time, as it requires from 3 to 5 years to grow them in the nursery. The cost, naturally is higher, but your extra cost is quickly returned to you by the fruit which they will produce soon after they are planted. These trees require no special culture. They must be carefully planted, however, spreading out the roots in the opening and setting them deep enough so that the wind will not blow them over. They should be carefully watered after planting and a small addition of a commercial fertilizer—about 3 to 4 tablespoons per tree would be very beneficial.

CAN BE SHIPPED BY EXPRESS OR FREIGHT ONLY!

SUPER SIZE APPLE TREES

These are large trees. They will caliper more than one inch, are extremely heavy branched and well-rooted. For varieties see Pages 19 and 20.

6 to 7 ft. trees, \$1.95 each; 2 for \$3.50; 5 for \$7.95.

SUPER SIZE PEAR TREES

Pears do not grow to a great height in the nursery but these trees will be from 5 to 7 ft. in height and one inch in caliper. See Page 22 for varieties.

5 to 7 ft. trees, \$1.75 each; 2 for \$3.00; 5 for \$7.00.

SUPER SIZE PEACH TREES

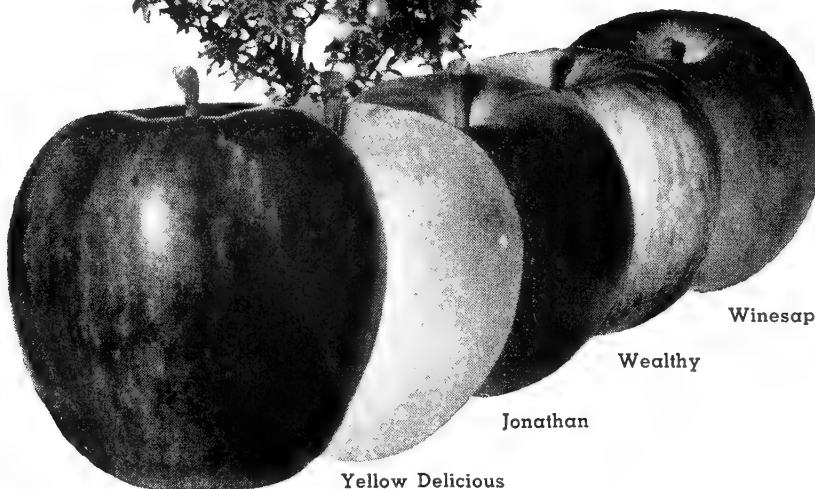

These peach trees caliper one inch and up. Well branched, extra heavy root system. Available in all standard varieties. See pages 11, 12, 13 and 14.

5 to 6 ft. trees, \$1.75 each; 2 for \$3.00; 5 for \$7.95.

SUPER SIZE CHERRY TREES

Available in Montmorency only! Blocky, heavy-bodied, well-rooted, branched cherry trees. Will caliper more than one inch. Will bear quickly.

5 ft. up, \$2.25 each; 2 for \$3.95; 5 for \$8.85.

Winesap

5 In 1 APPLE TREE "The City-man's Apple Orchard"

The quintuplet apple is a tree that has been produced so that the small home owner, who has a restricted planting space, can have a variety of apples over a long picking season. We have budded some of the best kinds so that you will have a Double-Red Delicious, Jonathan, Winesap, Yellow Transparent, and Wealthy. These are five of the best varieties and they will bear fruit over a long period of time. The different varieties will bloom at different times and these trees can be used for ornamental purposes if desired.

These are large, 4 to 6 ft. trees, and are priced at \$2.25 each; 2 for \$4.10; 5 for \$9.75.

Stahelin's Improved APPLES

DOUBLE-RED JONATHAN

Is a solid-red type of the Jonathan variety. It colors up very early in the fall, and enables you to pick your fruit a week to ten days before the common Jonathan will color up. The tree is medium in size, the fruit is firm, crisp and tender. Long lived, productive, and a very early bearer. A wonderful winter apple. **PRICED BELOW.**

SOLID-RED WINESAP

An improved strain of the old Stayman's Winesap, which gives you a great deal more color early in the season. It is a large, round, cherry red winter apple which is a wonderful keeper. Has a slight sweet-acid flavor, and is very popular for eating or cooking purposes. Tree is very hardy and thrifty. **PRICED BELOW.**

RED NORTHERN SPY

An improved strain of the common Spy apple. We have selected it from the best trees we can find so as to get a Northern Spy that will color up early in the fall. Our Red Northern Spy will do this. Very popular for eating and housewives demand it wherever it can be secured as it is wonderful for pies and sauce as well as eating. Flesh is white, tender and sub-acid. **PRICED BELOW.**

CORTLAND

This variety is perhaps the finest of our fall apples. It is a cross of the common McIntosh and the old Ben Davis. It retains all the fine qualities of McIntosh as to flavor, coloring, etc., but it also has the sticking qualities of Ben Davis. It adheres to the tree when the ordinary McIntosh falls to the ground. Large, dark red and good shipper. **PRICED BELOW.**

YELLOW DELICIOUS

This variety is identical in shape and size with the ordinary red Delicious, but is completely yellow in color. Is sweetly acid in flavor, with flesh that is very firm, crisp and juicy. Splendid shipper. Popular and profitable everywhere. The trees we offer are all from parent trees selected for extra quality, size and vigor. Bears young and is very productive. **PRICED BELOW.**

DOUBLE-RED DELICIOUS

This is the improved type of the common Delicious. The Double-Red naturally colors up much more and much sooner than the old Delicious. The tree does well practically all over the United States. Fruit is a wonderful size, is finely fleshed, juicy, and has a sort of sweet flavor with a slight acid taste. Excellent for eating and the most popular for fruit-stand purposes. Outsell all others. Makes a very good winter apple. **PRICED BELOW.**

HYSLOP CRAB

This is the only variety of crab apple that we list, as it is by far the best. Fruit is a dark purple color when fully ripened and has a wonderful flavor. Used by canners for pickling, jelly, etc. Trees produce enormous crops, are long lived, and very hardy. **PRICED BELOW.**

Double-Red
Delicious

Stahelin's APPLES

IMPROVED STRAINS

Yellow
Transparent

YELLOW TRANSPARENT

This variety is good to eat long before other varieties are ready. It is yellow in color; very crisp, juicy white flesh, and has a delicious flavor. One of the best of the early varieties. Tree is very productive; grows rapidly, bears young, and is very profitable. **PRICED AT RIGHT.**

Grape Plants

CONCORD

Grows on all soils, producing enormous crops of large blue-black berries of highest quality fruit. Highly resistant to drought, insects and diseases. Ripens mid-September. America's leading wine and table grape. **Huge 3 yr. plants, 85c each. Other plants PRICED ABOVE.**

SENECA

Commonly called the skinless grapes. Golden honey colored, flavor sweet and delicious. Vine is vigorous and very productive. A fine grape for storage. **Prices: 1-yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.**

VAN BUREN

Absolutely new, although it has been thoroughly tested in all grape growing sections. Luxuriant grower, producing compact and well shaped bunches of blue-black color. Exceptionally sweet. Extremely early, ripening 3 to 4 weeks before any other grape is on the market. **Prices: 1 yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.**

[20]

WEALTHY

This is a variety that apparently does well all over the United States, and is one of the few kinds of apples that can be grown in the northwest successfully. It is a fall apple, medium in size, and has a very fine flavor. Much desired for cooking and pie making. The tree is quick bearing and extremely hardy. **PRICED BELOW.**

GRIMES GOLDEN

An all yellow apple. Round in shape, medium size, and the tree produces an enormous crop practically every year. It is quite acid in flavor, and is in much demand for canneries or cooking purposes.

Quite hardy, and the tree is one of the best pollinizers that we know of. It ripens in the fall and is a good winter apple. **PRICED BELOW.**

RED ROME

This variety is sometimes known as Callia Beauty, but it is simply an all-red strain of the old type Rome Beauty. It is very highly prized for baking purposes. It is almost a solid red, and the apple is produced on a tree which is very large in size. Fruit is white, crisp, with delicious flavor, and is one of the best varieties for winter storage. **PRICED BELOW.**

RED MCINTOSH

A superior strain of the old type McIntosh. It is practically all red and retains its color and appearance well after being picked. It sticks to the tree a great deal better than does the common McIntosh. It is a very important Fall apple. Trees are very hardy and bear quite young. An exceptionally fine eating apple, of good size, bright red color, and a delicious aromatic flavor. **PRICED BELOW.**

GOLDEN MUSCAT

Bunches are of good size, brilliant yellow in color, and have a delicious flavor. Will do well wherever the Concord grows. Excellent shipper and producer. **Prices: 1 yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.**

NIAGARA

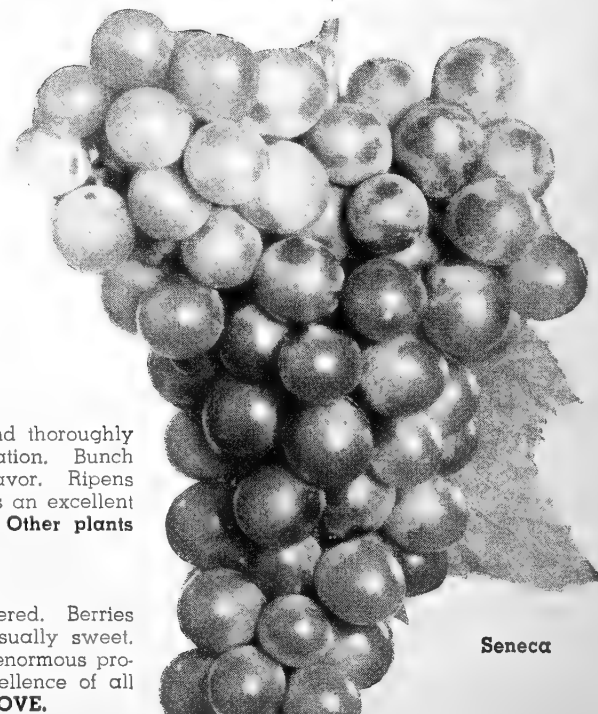

Leading commercial white grape. More productive than other white varieties. Berries are very large, and bunches compact. The quality of Niagara compares with Concord. **PRICED ABOVE.**

FREDONIA

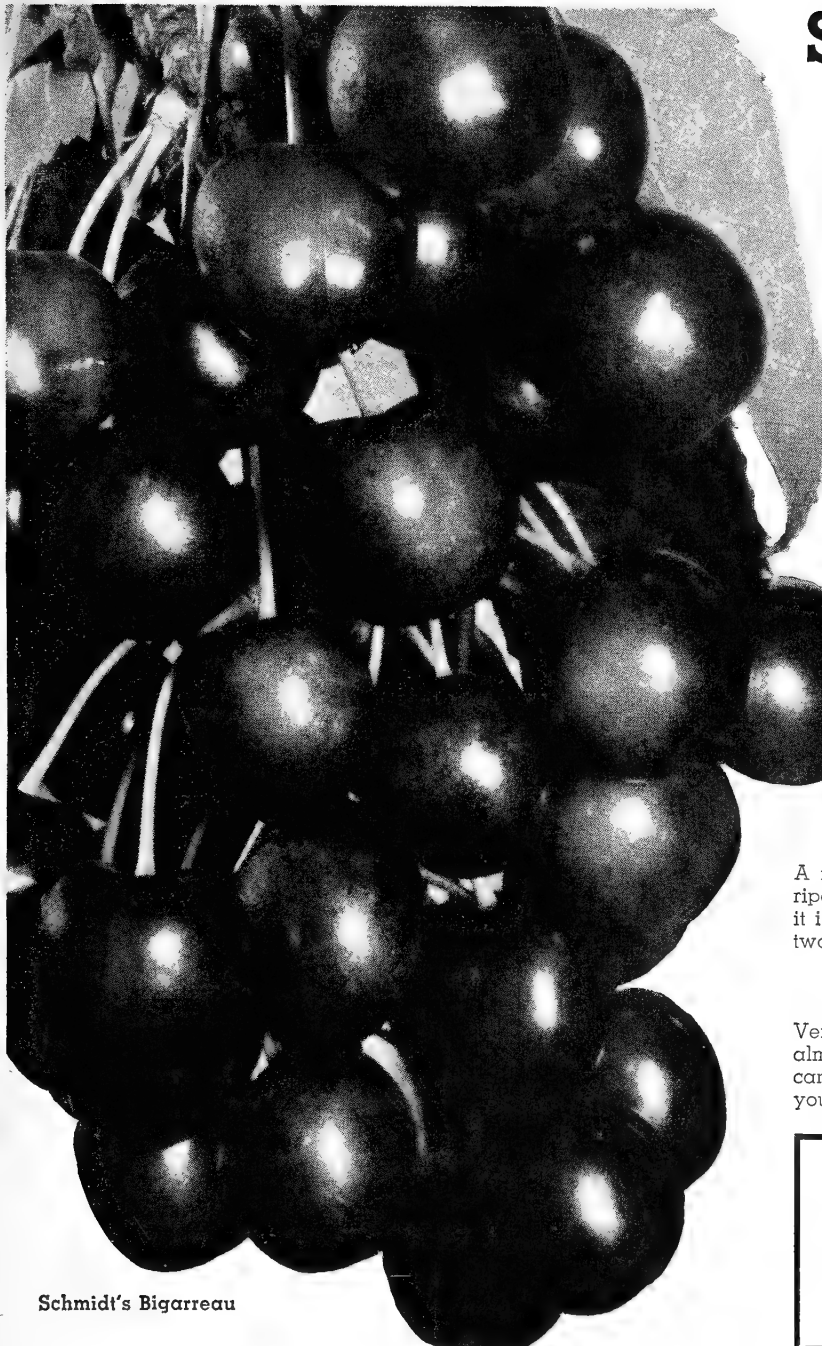

A new early black grape, originated and thoroughly tested by the New York Experiment station. Bunch and berries are large with excellent flavor. Ripens fully 10 days before Moore's Early and is an excellent shipper. **Huge 3 yr. plants 85c each. Other plants PRICED ABOVE.**

DELAWARE

Small, compact bunch, sometimes shouldered. Berries are small, red, with thin skin, and unusually sweet. Ripens with Concord. Very hardy, and enormous producer. Long called the standard of excellence of all grapes as a table delicacy. **PRICED ABOVE.**

Seneca

Schmidt's Bigarreau

SWEET CHERRIES

Require especially high, dry soil for successful growing. If you do not have this soil don't waste your time planting these trees. Should be planted about 25 ft. square and no trimming should be done the first two years.

Our alluvial soil produces a very fibrous root system which is quite contrary to the general trend of sweet cherries in other districts where they have only a tap root. We suggest that you plant at least two trees, even if of the same variety for cross-pollination.

NAPOLEON

This is a choice yellow sweet cherry of highest quality. Large size, very firm, juicy and sweet. A very heavy producer of fruit with bright red cheeks. Sometimes known as Royal Anne or White Oxheart. **PRICED BELOW.**

SCHMIDT'S BIGARREAU

A hardy strain of Bing, about the same size, and presents much the same appearance. Is a deep mahogany red in color; flesh is tender, juicy and fine-flavored. Bears young, hardy, sure cropper. **PRICED BELOW.**

WINDSOR

A large dark red cherry. Flesh is quite firm, making it an excellent shipping variety. Fruit clings to the tree long after ripe. Trees are hardy, regular prolific bearers, and good pollinizers. **PRICED BELOW.**

YELLOW SPANISH

A fine yellow cherry that is slightly darker than Napoleon when ripe, and which it resembles a great deal. As a yellow cherry it is one of the best. Has slight red cheek when fully ripe. Plant two or more for cross-pollination. **PRICED BELOW.**

BLACK TARTARIAN

Very common black sweet cherry. The inside flesh is purple or almost black, and is very sweet and juicy. Popular for eating, canning and shipping. Ripens early. Trees are hardy and bear young. Good producers of large size fruit. **PRICED BELOW.**

PEAR TREES

BARTLETT

The favorite commercial pear. Fruit is very large, juicy, orange-golden yellow in color with a soft blush. It is quite uniform in shape. Favorable for shipping, canning, and eating. The tree is a strong grower, and produces very young. Hardy and a regular bearer. **PRICED BELOW.**

CLAPP'S FAVORITE

Perhaps the largest of all pears, and always tops the market because of its excellent appearance. It is greenish yellow skinned with a dark red blush. Quite juicy and sweet. It is a good shipper and the fruit ripens a few days after Bartlett. **PRICED BELOW.**

SECKEL

A little red sugar pear. It is the richest, highest flavored pear known. It is much desired for pickling and canning purposes. The tree is very hardy. Fruit ripens in late September. Blight resistant. **PRICED BELOW.**

FLEMISH BEAUTY

A pear that is absolutely honey sweet in flavor when fully ripe. It is medium to large in size, pale yellow colored with a reddish brown cheek. Flesh is fine grained, juicy, rich and very sweet. Tree lives to a remarkably old age. Fruit ripens about the same time as Bartlett. **PRICED BELOW.**

BOSC

A popular pear in California due to its wonderful keeping qualities. A very long-necked pear which is used for boxing purposes, but is highly desirable because of its excellent flavor and shipping qualities. Tree bears young and is hardy. **PRICED BELOW.**

LAWSON

This pear, which is about the same size as Bartlett, ripens 50 days before Bartlett. It comes on the market when no other pears are to be had. Very juicy and rich in flavor when picked properly. Golden yellow with a brilliant red cheek. Tree grows to great height and is quite free from blight. **PRICED BELOW.**

GOLDBECK PERFECTION APRICOT

A perfect variety for vigor and hardiness. Very uniform in size, averaging that of medium sized peach. Delicious Flavor! Rich, golden colored apricot-yellow, ripening evenly all over. Can be picked tree ripe for shipping. The finest apricot today. **Prices:** 3-4 ft. \$1.50 ea.; 3 for \$3.75; 10 for \$11.95. 4 ft. up \$1.95 ea.; 3 for \$4.50; 10 for \$12.50.

ORANGE QUINCE

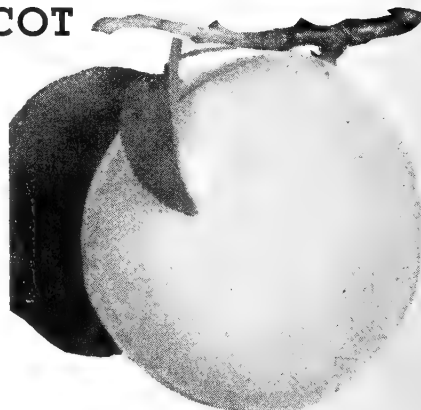

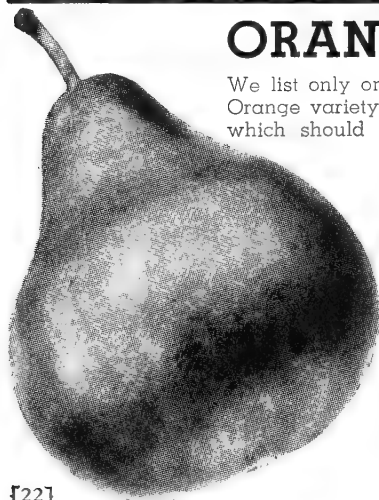

We list only one kind of Quince, which is the Orange variety. This is a dwarf growing tree which should be planted about 12 to 14 ft. apart. The foliage is very leathery, disease resistant and quite dark in appearance. Orange Quince is hardy in practically all sections. The fruit is as large as a good sized apple, golden yellow in color. This variety is valued very highly for preserving or jelly making. **Price:** 2 to 3 ft. each \$1.45; 3 for \$3.90; 10 for \$11.50. 3 to 4 ft. each \$1.65; 3 for \$4.50; 10 for \$12.50.

PLUM TREES

STANLEY PRUNE

The Stanley Prune plum is without a doubt the finest and most beautiful blue plum that we have today. It is very large, very rich in flavor, and it is hardy in all sections of the United States. It is deep blue in color with a golden yellow flesh and it is absolutely freestone. The chief quality of Stanley Prune, other than its large size and beautiful color, is that it does not rot on the tree. It is quick bearing, often starting to bear the second year after it is planted. Excellent shipper. **PRICED BELOW.**

MONARCH

One of the best of the blue plums. It is absolutely round in shape, medium to large in size, and the trees are very hardy. The flesh of the plum is golden yellow; and the fruit clings well to the tree. A very good variety for market. Bears early and in abundance. Monarch is a good pollinizer. This variety is a wonderful all-purpose plum—it's flavor is delicious, it is juicy, a good canning plum and a good shipper. **PRICED BELOW.**

BLUE DAMSON

Most popular of all preserving plums. Extremely high flavored. Turns a rich wine-red when preserved. Small fruit, dark blue in color, rich golden interior. Highly prized for making jams and jellies. The tree is hardy, bears early and is a very heavy producer. Grows 10 to 12 feet high. **PRICED AT RIGHT.**

YELLOW EGG

A plum that is egg shaped, very large size, golden yellow, and extremely sweet. Prized highly for culinary purposes. Trees grow very large, are hardy and vigorous. Fruit ripens in late August. **PRICED ABOVE.**

Red Lake
Currant

Currants can be shipped to the following states only: Illinois, Michigan, Indiana, Kansas, Iowa, Missouri, Oklahoma, Nebraska, Texas, Colorado, Kentucky, North and South Dakota.

NECTARINE (Fuzzless Peach)

One of the most delicious of all fruits. Smooth skin of bright golden color with slightly red cheek. Rich flavor, juicy, and highly prized as a dessert fruit. Nectarines are hardy as peaches and require same culture. The tree is vigorous and bears young. **Prices: Medium size trees, \$1.45 each; 3 for \$3.90, 10 for \$11.50.**

EVERBEARING FIG

Have Sweet, Juicy Figs in Your Garden. Our Everbearing Fig is very well adapted to growing in the north. Will produce either in the field or in any container in which you may plant it. Produces first year set out and heavily each year after. Fruit is a good size, sweet, firm, excellent for preserving or eating. **Price: 18-24 in. trees, 75c each; 3 for \$2.10.**

RED LAKE CURRANT

The finest Red Currant today. Originating in the northwest it is very hardy and will grow almost anywhere. Ripens mid-season. Bunches are large and very easily picked. Bush is thrifty and grows quite tall.

WILDER CURRANT

One of the most popular of Red Currants in this large currant-growing section. This is a fine commercial variety. It has large bunches and berries are very firm.

RED CROSS CURRANT

A very highly prized variety, preferred by many growers. Very reliable. Bears dark red, firm clusters with high pectin content. Excellent for jellies.

A BEAUTIFUL LIVING BARBED-WIRE FENCE MULTIFLORA ROSE

Low Initial Cost—No Repairs

Stock-Proof and Well-Behaved

Multiflora rose is being sold to those farmers who are up against it because of the high cost of posts and wire. This plant will grow and thrive under any conditions and is very well behaved—it does not throw up sprouts nor spread, but continues to grow thicker and higher as it grows older. It will solve your fencing problem! We have these plants economically priced in the small size, but if you want quick results, plant the large or jumbo size.

COLORADO SPRUCE

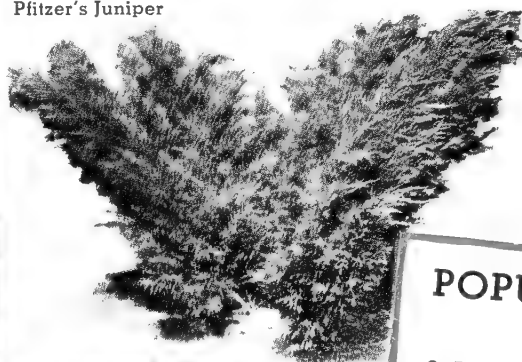

The Colorado Spruce is without a doubt one of the finest of blue-type evergreen trees. It grows to a great height and is an ornamental tree of glistening silvery blue from early spring to midsummer. Originated in the cold section, it is very hardy and is perhaps the most showy and popular of all spruce trees. We have grown an especially fine lot of this spruce, the seeds taken from carefully selected trees so as to obtain the very finest color.

PRICES: 8-10 in., twice transplanted, 95c each; 3 for \$2.70; 10 for \$8.50. 12-15 in. trees, \$2.15 each; 3 for \$5.95.

For Beauty & Comfort, SHADE TREES

SILVER MAPLE

Dark green leaves with silvery surface underneath. Speedy grower, thrives anywhere. 2 yr. 4-5 ft. trees, each 55c; 3 for \$1.50; 10 for \$4.50; 50 for \$19.00.

AMERICAN ELM

Natural spreading and drooping tree. Favorite for street and general planting. Tall-growing, long-lived, hardy. 4-5 ft. trees, each 55c; 3 for \$1.50; 10 for \$4.50.

EUROPEAN WHITE BIRCH

Hardy, tall-growing, upright lawn tree of distinctive character, its creamy white bark contrasting sharply with its foliage. 5-6 ft. trees, each \$2.45; 3 for \$6.75.

GOLDEN WEeping WILLOW

Has golden yellow twigs with narrow green leaves. Slender branches hang in a beautiful arch to the ground. Hardy, grows fast. 3-4 ft. trees 85c each; 3 for \$2.40.

EUROPEAN MOUNTAIN ASH

A very popular tree all over America. At maturity attains a height of 18 to 25 ft. In late summer it is laden with drooping clusters of bright red berries against a background of lacy green foliage. Hardy, and one of our most beautiful ornamental trees. Owing to its scarcity, we have been unable to list it for several years but we now have a fine supply of our own growing. **PRICE:** 3 to 4 ft. each \$2.25; 3 for \$5.95; 4 to 5 ft. each \$2.75; 3 for \$6.75.

Stahelin's FLOWERING TREES

FLOWERING PEACH

Flowers appear early in spring before the tree leafs out and are very thick. Height about 15 ft. at maturity. Available in red or white flowers. State color. 3½ to 5 ft., \$1.25 each; 3 for \$3.50.

White Flowering Dogwood

Large, white flowers with an extra row of center petals. Red berries in fall, also leaves turn red. Grows to a height of 10 to 15 feet at maturity. May be trimmed as desired. 3 to 4 ft. trees, \$1.25 each; 3 for \$3.25.

CHINESE ELM

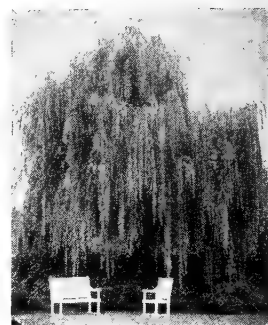

Fastest growing shade tree today. Extra hardy, thrives anywhere. Useful for windbreaks, and specimen planting. 3-4 ft. trees, 55c each; 3 or more 45c each. 5-6 ft. trees, 65c each; 3 or more, 55c each. 7-8 ft. trees, \$1.35 each; 3 or more, \$1.25 each.

WISCONSIN WEeping WILLOW

Graceful drooping. More slender leaves and hardier than the ordinary Babylonica. Rapid grower. 3-4 ft. trees, 75c each; 3 for \$2.10; 10 for \$6.50.

LOMBARDY POPLAR

Well known for its tall, slender, upright growth. Rapid grower on any soil. Dark green leaves, lighter shade on the under side. Roots do not clog drains. 5-6 ft. trees, 75c each; 3 for \$2.10; 10 for \$6.50.

Wisconsin Willow

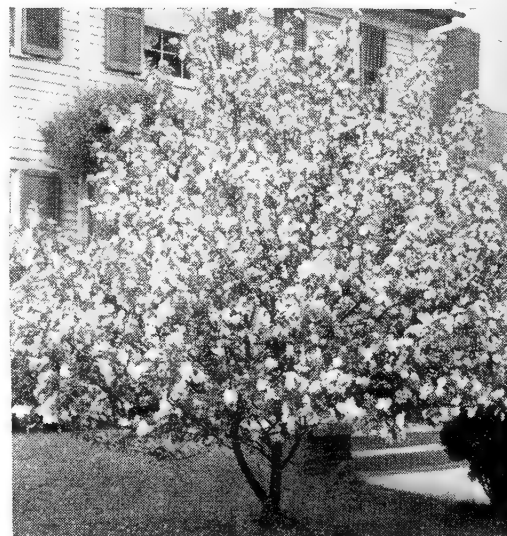

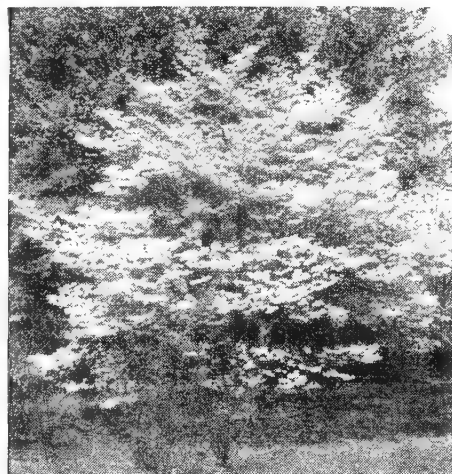

Lombardy Poplar

TULIP TREE

Tall, pyramidal, with broad glossy leaves. Bears tulip-like flowers of white with green centers in June. Excellent for street or lawn. 3-4 ft. trees, 75c each; 3 for \$2.10.

BECHTEL'S FLOWERING CRAB

A hardy, small, flowering tree. Double flowers of delicate pink, resembling small Roses. Very fragrant. Ideal for the small lawn. 18 to 24 inch trees, 95c each; 3 for \$2.70.

6 Ways to Make Your Home Beautiful

Red Japanese Flowering Quince

Rose Tree of China

Azalea Mollis

Beautiful

1. Red Japan Flowering Quince—

Very early in the spring, this shrub is completely covered with bright orange to scarlet flowers, followed by small fragrant quince-shaped fruits. Foliage dark, glossy green. Grows 5 to 7 feet tall. 18-24 in. strong field grown plants, 75c each; 3 for \$2.10.

2. Rose Tree of China—

(Prunus Triloba.) Beautiful hardy flowering plum, covered with small full double rose-like blooms before leaves come. Similar to Flowering Almond but much larger. Grows to height of about six feet. 2-3 ft. trees \$1.25 each; 3 for \$3.10.

3. Azalea Mollis—

These fine Azaleas grow 3 to 4 ft. tall. Hardy. Bloom in May and June, the striking flowers, which are generally seen only in the South, completely covering the bush after a few years. Prefer partial shade and slightly acid soil. 12-15 in. field-grown plants \$1.25 each; 3 for \$3.10.

4. Red Flowering Dogwood—

(Cornus Florida Rubra.) Red buds which open into exquisite four petaled deep pink flowers with yellowish green centers. Red berries in fall. Trees grow 10 to 15 ft. tall. Attractive grayish green foliage in summer, turning to rich crimson in early autumn. 18-24 in. trees, \$2.25 each; 3 for \$5.95.

5. Magnolia Soulangeana—

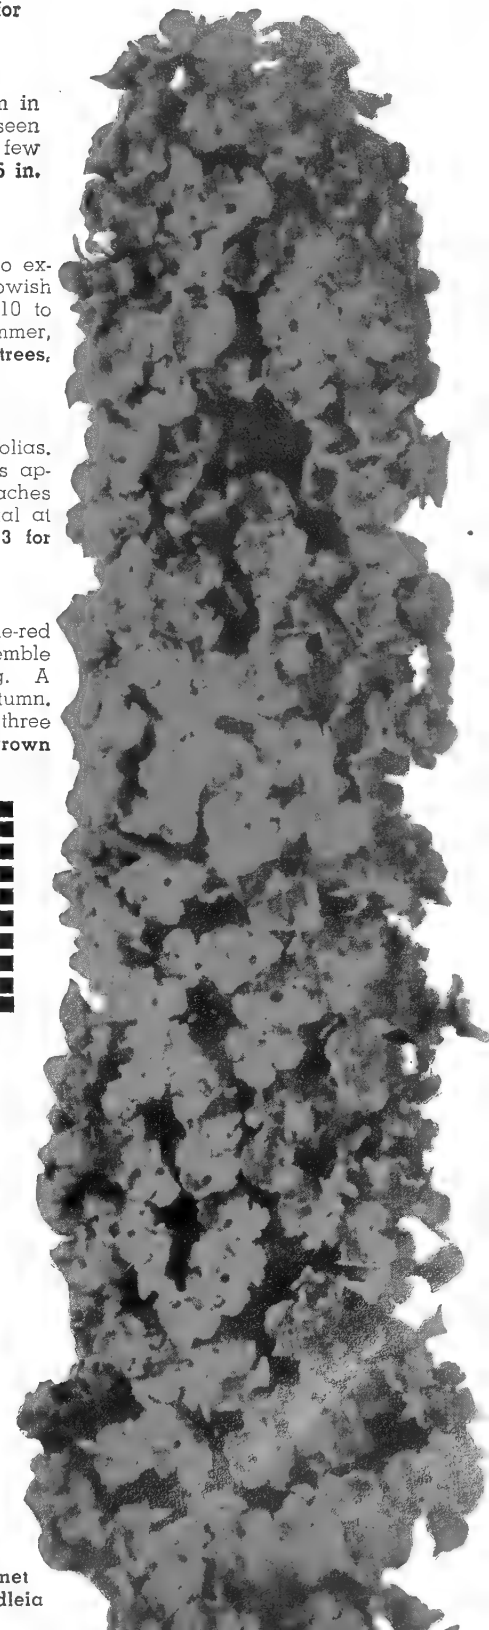

Most popular and decorative of any of the Magnolias. Produces large rose-pink blooms before any leaves appear in the spring. Hardy, easy to grow. Reaches height of 10 to 15 ft. at maturity. Very ornamental at all times. 18-24 in. branched trees \$2.65 each; 3 for \$7.50.

6. Dubonnet Buddleia—

Commonly known as the Butterfly Bush. Rich wine-red with slight purple overcast. Flowers, which resemble lilacs, are produced in panicles 15-18 inches long. A profusion of fragrant flowers from July until late autumn. Attains a height of about five feet. Offered in three additional colors on Page 32. Strong, 2 yr. field grown plants, 60c each; 3 for \$1.10.

Red Dogwood

Dubonnet Buddleia

Stahelin's Hardy Flowering Shrubs

BUDDLEIAS

(Butterfly Bush). Bloom from early summer to frost, with panicles often 15 to 18 inches long. Flowers are fragrant and profuse. Available in Charming (Pink), Ile-de France (Rosy purple), Orchid Beauty (Brilliant Orchid). **Strong**, 2 yr. field-grown plants, 55c each; 2 for \$1.00.

HYDRANGEA, P. G.

Immense cone-shaped blooms, first white and then turning pink and bronze. Blooms in August with panicles measuring 8 to 12 inches long. Makes a fine winter decoration if allowed to dry on the bush. **Strong** field-grown plants, 85c each; 3 for \$2.40.

SPIREA YELLOW NINEBARK

This is a very vigorous Spirea. Striking white blooms. The leaves of this variety are a golden yellow. Flowers are followed by orange-colored pea pods, which are quite attractive. Reaches a height of 5 to 6 ft. at maturity. 18-24 in. field-grown plants 55c each; 3 for \$1.50.

DEUTZIA, PRIDE OF ROCHESTER

Masses of large white flowers, tinged with pink, cover the plant in May. Will thrive in sun or part shade on ordinary soil and moisture. Bushy shrub which grows from 6 to 8 ft. high. Space 5 feet apart. **Strong** field-grown plants 55c each; 3 for \$1.50.

HIGH BUSH CRANBERRY

Brilliant green foliage with single white flowers in April and May, followed by clusters of scarlet berries, in fall, which are good to eat. Fruit is as large as the average cherry, with an excellent flavor. Foliage turns red and gold in autumn. Hardy. Field-grown plants 85c each; 3 for \$2.40.

PERSIAN LILAC

Graceful drooping branches with small foliage and flowers of bright purple. Blooms in May and June and reaches a height of 6 to 8 ft. at maturity. Makes a beautiful hedge when planted 2 ft. apart and trimmed to desired height. **Strong**, field grown plants 55c each; 3 for \$1.50.

DOUBLE FLOWERING ALTHEA

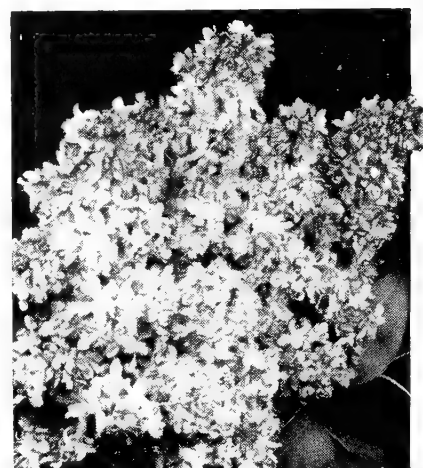

(Rose of Sharon). Large double blooms from mid-summer until winter. Grows to a height of 6 to 8 ft. Ideal for backgrounds or shrub borders. Very popular. Red or White. **Strong** field-grown plants 50c each; 3 for \$1.35. State color.

GOLD FLAME HONEYSUCKLE

A variety that is hardy and will grow any place. Large rose-red trumpets lined with a light to deep golden yellow. Good for trellises if allowed to grow naturally. Pruned, it makes an excellent specimen shrub. Field-grown plants, 95c each; 3 for \$2.70.

Lovely Ornamental Shrubs Make a Home Out of a House

SNOWBALL

Pure white blossoms with heavy dark leaves; show up remarkably well, when planted as a specimen or in a shrub group. **Sturdy, field-grown plants, 85c each; 3 for \$2.40.**

FLOWERING ALMOND

This shrub blooms very early in spring, even before the leaves appear. Every branch and twig is completely covered with small double shell-pink flowers which resemble small roses. Grows 3 to 4 ft. tall. **24-30 inch trees each 95c; 3 for \$2.70.**

TAMARIX HISPIDA

Very dense, silvery-blue feathery foliage. Bright pink flowers all summer. 10 to 15 ft. tall at maturity but can be kept pruned to desired height. **18-24 in. plants, 55c each; 3 for \$1.50.**

SMOKE TREE

Purple Fringe Smoke Tree. Strikingly different shrub. Hardy and easily grown. In late Summer and Fall it is covered with fine, purplish, misty-looking flowers which give it a smoky appearance. **18-24 in. trees, 95c each; 3 for \$2.70.**

CHASTE TREE

Combines unusual beauty of foliage with attractive spikes of lavender-blue flowers borne in upright panicles on tips of stems. Blooms from July until frost. **Sturdy, 2-3 ft. trees, 95c each; 3 for \$2.70.**

FRENCH PUSSY WILLOW

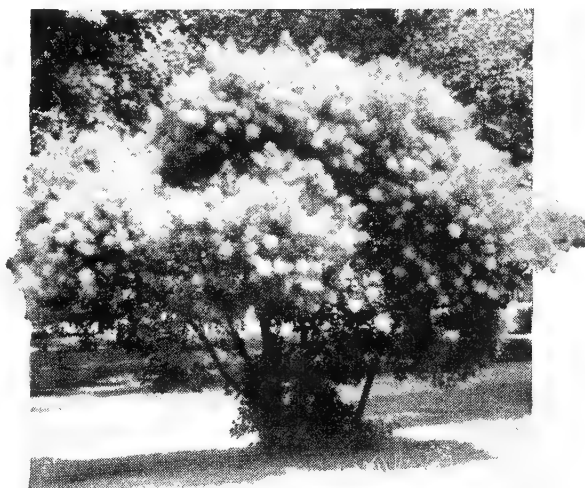

Silky gray catkins burst forth to decorate the brown twigs early in the spring. Branches may be cut in mid-winter for bouquets in the house. Large tree-like shrub with long, narrow leaves. **3-4 ft. shrubs, 55c each; 3 for \$1.50.**

HOPA FLOWERING CRAB

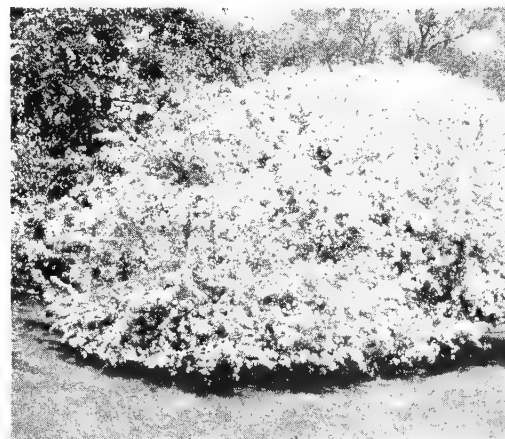

Most beautiful Flowering Crab that can be grown in the North. Absolutely hardy. Graceful, medium-sized tree strikingly ornamental. Buds are blood-red, flowers deep-rose colored. Fruit makes excellent jelly. **3-4 ft. trees, \$1.25 each; 3 for \$3.10.**

PHILADELPHUS VIRGINALIS

(Double Mock Orange.) White. Everblooming. Blooms profusely in June for about three weeks and then intermittently until frost. Strong grower—6 to 7 ft. at maturity. **Field-grown plants, 85c each; 3 for \$2.40.**

Calycanthus

Beautiful Flowering Shrubs

FORSYTHIA GOLDEN BELL

Golden blossoms cover every limb and twig before the leaves are out. Grows 8 to 10 feet tall. Plant 5 to 6 feet apart in ordinary soil; ordinary moisture; sun or part shade. **Strong field-grown plants, 55c each; 3 for \$1.50.**

CALYCANTHUS

Sweet Shrub. An old garden favorite. Fragrant shrub with chocolate colored flowers and shiny green leaves. Blooms from May to October. Reaches a height of 8 to 10 feet. **Strong, field-grown plants, 65c each; 3 for \$1.80.**

HALL'S JAPANESE HONEYSUCKLE

Very strong and vigorous growing. Produces pure white flowers gradually changing to yellow. Blooms the entire summer. Very fragrant. Does equally well all over the country. **Field-grown plants, 60c each; 3 for \$1.50.**

BEAUTY BUSH

(Kolkwitzia Amabilis.) Fragrant pink, tubular-shaped flowers, followed by fuzzy ornamental seed pods which remain all winter. **Strong, field-grown plants, 85c each; 3 for \$2.40.**

HONEYSUCKLE PINK TARTARIAN

Bright pink flowers in spring, followed by loads of bright red berries in the fall. Thrives in the shade or in the sun. Grows to a height of 5 to 6 ft. Very hardy. **Field-grown plants, 55c each; 3 for \$1.50.**

MAY DAY TREE

First tree to leaf out and bloom in the spring. Fragrant pure white flowers which resemble lilacs in shape. Lovely for cutting. Grows rapidly and may be trimmed to form a tree or left in bush form. **3-4 ft. trees, \$1.25 each, 2 for \$2.25.**

HANSEN'S BUSH CHERRY

White flowers in spring and maroon-red leaves in fall. Fruit is plum shaped but the size of a sweet cherry. Fruit grows in clusters and is very tasty. Easy to grow and makes a beautiful shrub. **18-24 in. branched transplants, 50c each; 3 for \$1.35; 20 for \$7.65.**

MOCK ORANGE

A tall bush with dark green foliage. Extremely vigorous, blooms in early spring with graceful sprays of fragrant white flowers, closely resembling orange blossoms in form and fragrance. **Strong field-grown plants, 50c each; 3 for \$1.35.**

WEIGELA ROSEA

Tall and vigorous growing with trumpet-shaped, rosy-pink flowers in thick clusters along each branch, in June. Grows 4 to 5 feet tall and can be trimmed as desired. **18-24 in. field-grown plants, 55c each; 3 for \$1.50.**

RED SNOWBERRY

Bush is covered with pink flowers in June, followed by red berries in compact clusters the full length of graceful branches. Small green leaves on both sides of the branches. Grows to medium height. Does well in sun and shade. 18-24 in. plants 55c each; 3 for \$1.50.

RED TWIG DOGWOOD

A handsome and attractive native shrub. Free flowering with myriads of white berries making a striking contrast to its blood-red stems. Berries remain on bush and attract many kinds of birds in winter. 18-24 in. plants 55c each; 3 for \$1.50.

Red Twig Dogwood

SPIREA BILLIARDI ROSEA

(Pink Spirea.) Grows 5 to 6 ft. high. Pink flowers in spikes during July and August. Plant 4 to 5 ft. apart in ordinary soil; ordinary moisture; sun or part shade. Very attractive when in full bloom. Strong field-grown plants 55c each; 3 for \$1.50.

SPIREA CALLOSA ROSEA

A dwarf variety, growing 24 to 30 inches high, which produces large, flat clusters of reddish pink flowers nearly all summer. Handsome foliage. Removal of flowers as they fade will cause continuous bloom throughout summer and early fall. Strong plants 55c each; 3 for \$1.50.

WHITE SNOWBERRY

A desirable shrub with small pink flowers, followed by large white, wax-like berries, which hang on the plant through most of the winter. Very showy and succeeds everywhere. 18-24 in. plants 65c each; 3 for \$1.80.

DEUTZIA CRENATA ROSEA

Beautiful, double pink flowers thickly stud the graceful upright branches in May. 3 to 5 ft. in height at maturity. Should be included in every planting. Strong, field-grown plants 55c each; 3 for \$1.50.

MIDGET VEGETABLES For The Small Garden

Now, with even the smallest back yard space you can enjoy garden fresh vegetables. You'll say this new race of miniature melons and vegetables is the best eating you've ever known! Easy to grow; simple cultural instructions with every order.

NEW HAMPSHIRE MIDGET WATERMELON

Miniature 7 to 8 inch melons; easy on refrigerator space! Crisp, juicy, delicious; few seeds, practically no rind; extra high sugar content.

TINY TIM MIDGET TOMATO

Novel, 3/4 inch bright red tomatoes on dwarf plants. Easy to grow in house or garden. Delicious flavor. A new touch for salads, garnishes and preserves!

BABY BUSH PUMPKIN

Perfect 8-inch pie pumpkins on dwarf bush-like plants! Their fine-grained, deep-golden flesh make delicious flavor-rich pies. Produce surprising numbers of bright orange fruits.

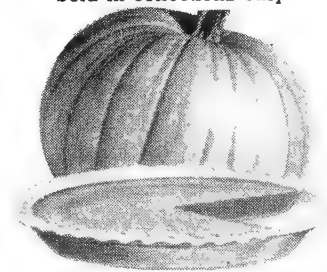

Golden Midget Sweet Corn

Tenderest, sweetest corn ever grown! 4-inch butter-yellow ears on 30-inch plants. Ideal for freezing and canning.

Midget Muskmelon

Vines only 3 feet long produce amazing numbers of luscious 4-inch melons, each an individual serving. Superb flavor. Edible to the rind.

Sold in collections only!

SPECIAL OFFER
5 Large Packets, one of each variety for only Postpaid \$1.00

THOMAS BLACK WALNUT

Big Profits And Delicious Nuts From A Beautiful Shade Tree!

Great care has been taken to bud the Thomas Black Walnut from the best parent trees to be found. It not only produces profitable crops, but will produce valuable timber in time. Thomas Black Walnuts are easy to grow as the trees flourish under almost any condition that is not too wet. Grows to great height in short time.

Produces Giant Size Nuts Second Year

Thomas Black Walnut trees usually begin to bear the second year after planting. They produce nuts of very large size with a thin shell, which cracks well. Nuts have wonderful flavor and kernels come out in halves, making the Thomas Black Walnut especially desirable. A mature tree will bear from 15 to 40 bushels of giant-sized nuts during a twelve-months' period.

MEYERS Black Walnut

This new variety is recommended by all of the nut tree specialists throughout the country. It is making a remarkable record, particularly on thinner ground. Nuts are not as large as Thomas, but they crack well and the shell is so much thinner that an equal amount of Meyers will yield as much as the same quantity of Thomas. The flavor is exceptionally rich.

All of our Black Walnuts are grafted trees and start bearing early.

Prices on Thomas and Meyers Black Walnuts

2-3 ft. trees, each \$1.95; 2 for \$3.70; 10 for \$17.50.

3-4 ft. trees, each \$2.25; 2 for \$4.20; 10 for \$19.50.

We list two distinct varieties. Please specify variety desired.

NATIVE BLACK WALNUT

Stahelin's Black Walnuts are grown from seed produced on our own farms from the Thomas, Stabler, and Weird varieties. While not as thin shelled as the nuts from cultivated trees, they are excellent and you still have a better Black Walnut. These trees are hardy anywhere in the U. S. and thrive in sunny, well-drained soil. Fast growing and long lived.

PRICES: 2-3 ft. trees, 65c each; 3 for \$1.50; 10 for \$4.25; 3-4 ft. trees, 75c each; 3 for \$2.10; 10 for \$6.50.

Grafted Black Walnuts producing at age of four years.

Chinese CHESTNUTS

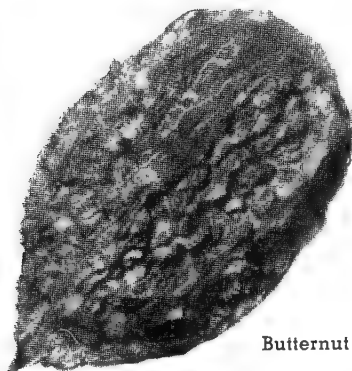

The Chinese Chestnut is the only Chestnut that we know of that is blight resistant. The seed from which our trees are grown are all collected from trees that are known to be true blight resistant and so isolated that the pollen from other Chestnut trees cannot mix with them. We offer these trees in two sizes, 2-3 and 3-4 ft., and both will be very well rooted but by buying the large size trees you will save several years time and they will come into bearing that much quicker. PRICE: 3 yr. 2-3 ft., \$1.25 each; 2 for \$2.25; 5 for \$5.25; 10 for \$9.50. 4 yr. 3-4 ft., \$1.75 each; 2 for \$3.25; 5 for \$7.50; 10 for \$13.95.

Chinese Chestnut

BUTTERNUT

This native nut tree grows in almost every section of the United States. Attains large size at maturity. Starts to bear very early, about 3 to 5 years of age, and will produce a crop annually. The native Butternut is a conical shaped nut that is very nutritious, carrying a very large amount of oil. It grows very easy. It makes an excellent shade and you can plant them in any corner or other sections where ordinary trees cannot be produced, as they require no spraying. PRICES: 2 yr. 2-3 ft. trees, 75c each; 3 for \$2.10; 10 for \$6.50.

Butternut

Hardy ENGLISH WALNUTS

NORTHERN GROWN - THIN SHELL

Plant Nut Trees For Profit, Beauty, Shade and Pleasure

The hardy English Walnuts which we handle are all direct descendants from the original seed which was sent here from the Carpathian Mountains. Their hardiness, rapidity of growth, their long life and beauty, and finally their timber, makes them very desirable. Besides this, they produce large quantities of edible nuts and add greatly to the value of any property on which they are planted. These trees are not always fertile, therefore we suggest that more than one be planted for cross-pollination and guaranteed success.

CARPATHIAN

The Carpathian English Walnut is the king of nut trees. It is a paper shell walnut. Grows in many parts of the world. Hardy. Produces nuts varying in size from that of the California English Walnut to three times its size.

WILLSON WONDER

The Willson Wonder English Walnut is the largest of all English varieties. Very prolific and fast growing tree. Excellent for shade and timber as well as nuts. Tree has grown to thirty feet and withstood below zero weather.

PRICE: CARPATHIAN OR WILLSON WONDER, STATE VARIETY: 2-3 ft. trees, each \$2.15; 2 for \$3.75; 5 for \$8.50; 10 for \$17.50. 3-4 ft. trees, each \$2.50; 2 for \$4.50; 5 for \$10.50; 10 for \$18.50.

If parcel post shipment is requested and shipping charges not included, we naturally assume that you want plants shipped C.O.D. for the postage.

APPROXIMATE WEIGHT OF PLANTS

Strawberry plants will weigh 5 pounds per hundred when packed and shipped separately. If shipped in thousand lots they will weigh approximately 40 pounds per thousand.

Asparagus plants will weigh approximately one pound for 25 one-year plants and 1½ pounds for 25 two-year plants.

Blackberry plants will weigh 4 pounds per 25 plants.

Dewberries, boysenberries, black raspberries, will weigh approximately 5 pounds for 25 plants.

EXPRESS: Shipments of nursery stock take a second class rate and are sent collect for the exact amount of shipping cost. Owing to the lower cost of shipping by parcel post at the present time, we recommend that shipments up to seventy pounds be sent by mail. Generally all shade and fruit trees and large quantities of stock must be sent by Express. We have worked out this plan of shipping to be the best way for you, with the least cost to you.

FREIGHT: Freight can be used when orders call for several hundred fruit trees or several thousand cane plants, and are to be shipped during early March or April.

Strawberry Plants Are Never Shipped By Freight: If undecided as to how to have your order sent, just give us your post office and nearest shipping point and we will route the cheapest and safest way.

YOUR REMITTANCE: Send a postal or express money order if possible; cash should be sent by registered mail, for we will not be responsible for loss if mailed in the ordinary manner. Personal checks will be accepted.

Prices in this catalog are good only for the spring and fall of 1951. However, should inflation, state or federal legislation add to our costs, we reserve the right to add to prices to cover increases.

If we have your name or address incorrect, or you are receiving more than one catalog at your address, please advise us so that we can change our mailing list accordingly.
